Welcome/Introduction

Welcome to the University of Arizona College of Medicine clerkships. Whether you are an academic faculty member, a faculty community preceptor, a faculty rural preceptor, a fellow, or a resident, we thank you for your dedication to teaching our medical students. We appreciate the time and effort that you devote and are certain that you will find the following material useful. Please note that in addition to this General Clerkship Instructor Manual, each departmental clerkship will also be providing you with a specific clerkship manual as it pertains to their specialty.

Attendance and Absence

Attendance Policy for Clerkships

This policy below is the clerkship portion; however, it is subject to periodic updating and the most recent version will always be found online.

Attendance Policy for Clerkships
Tucson
Approved by TEPC September 12, 2011
Revised January 15, 2020

Policy Statement:
This policy establishes guidelines and procedures for attendance and absences in required clerkships. Participation in learning activities is critical for students to develop into effective physicians. It is important for students to act in a professional manner and demonstrate a commitment to professional responsibilities.

- All clerkship experiences are mandatory including NBME Shelf Exams, Transition to Clerkships and Intersessions 1 & 2. Any absence must be recorded in MedLearn (see Procedure for Reporting and Tracking Absences).
- Excused absences will be remediated as deemed appropriate by the clerkship director.
  - To demonstrate that a student has remediated an absence, students will be expected to know the information and follow the requirements found in each clerkship manual.
- All absences must be requested a minimum of 30 days prior to the anticipated absence.
- Attendance Sign-In Sheet/Form: Signing-in or submitting an attendance sheet/form for another student is unethical and considered an Honor Code Policy violation. Students may ONLY sign-in/submit attendance sheet/form for themselves and no other student.

1. Excused absences

- Illness. In the case of a student’s own illness or injury, it is the student’s responsibility to ensure that an absence request is submitted to the clerkship director/clerkship coordinator in a timely manner. A note may be required from Campus Health or a primary care provider.
• **Presentation at a professional conference.** An excused absence may be granted for a student to present at a professional conference. Conference attendance alone, without presentation responsibilities, does not meet the requirements for an excused absence. Proof of acceptance to the conference where the student is presenting must be provided to the clerkship. The number of days excused may not exceed those allowed in the absence policy for each clerkship.

• **Leadership activity.** An excused absence may be granted for a student to represent the University of Arizona College of Medicine in a leadership capacity at a professional conference or meeting (for example, as an elected representative of UACOM on an AMSA committee). Conference attendance alone, without leadership responsibilities, does not meet the requirements for an excused absence.

• **Religious observance.** An excused absence may be granted for a student to observe a religious holiday, in accordance with University policy.

• **Jury Duty.** An excused absence may be granted for a student to fulfill this civic responsibility.

• **Bereavement.** An excused absence may be granted for up to three (3) days because of the death of student’s spouse, parent (natural parent, step-parent, adoptive parent), parent-in-law, sibling, child (natural child, adoptive child, foster-child, step-child), grandparents, grandchildren, brother or sister-in-law, or any other person who is a member of the student’s household.

  A student may be granted up to two (2) additional days in order to attend or arrange funeral services out-of-state. If a student requires an excused absence for more than five (5) days, the student must request a Leave of Absence with the Associate Dean for Student Affairs.

2. **Personal Day Passes**

• Students are allowed up to two (2) Personal Day Passes during their entire clerkship year curriculum to attend to personal business, weddings, reunions, or other events that are not included on the list of recognized excused absences.

• Students must submit a request for a Personal Day Pass a minimum of 30 days in advance to the clerkship director/coordinator and the request must be approved by the clerkship director/coordinator.

• Personal days may not be taken during the following:
  - Orientation
  - Last week of a clerkship rotation
  - Teaching/didactic days
  - OSCE
  - NBME exams
  - Other scheduled exams
  - Transition to Clerkships
  - Intersessions 1 & 2

• No half days or hour counts are permitted.
• Personal Day Passes are non-transferrable.
• A specific reason for a Personal Day Pass is not required.
• Approval is not guaranteed but will depend on the nature of the missed sessions and whether the sessions can be remediated, if deemed necessary, by the clerkship director.
• Absences may not exceed the maximum number of days allowed in a clerkship (see Procedure for Requesting and Tracking Absences).
• Personal Day Passes are not applicable to Transition to Residency phase.
• After use of two Personal Day Passes, any additional absence that does not meet criteria for an excused absence will be considered an unexcused absence.

3. Remediation of excused absences
• The clerkship directors will create a remediation plan that is specific to the unique requirements of their clerkship and that will apply to students at all sites within that clerkship.
• In the event that: (1) an absence is requested 30 days in advance; and (2) the clerkship director is unable to arrange a remediation plan because of the student’s prolonged absence or the clerkship director’s inability to recreate the needed clinical or didactic material, the clerkship director may deny approval for the requested absence.
• In the event that: (1) an absence due to illness or unanticipated events (i.e., 30 days advance notice is impossible); and (2) the clerkship director is unable to arrange a remediation plan because of a student’s prolonged absence, or the clerkship director is unable to recreate the needed clinical or didactic material, the clerkship director, in consultation with the Associate Dean for Student Affairs, may require the student to repeat the entire clerkship.

4. Unexcused Absences and Consequences of Unexcused Absences
• Any non-emergency absence that is taken without prior notification or permission of the clerkship director is considered an unexcused absence. This will be treated as an act of unprofessional behavior which will be included in the student’s final assessment.
• An unexcused absence from clerkship didactics may be noted in the final assessment and may affect the student’s final grade.

5. Holidays
• Clerkship sites will observe the holiday schedule of the University of Arizona.
• A student may request to work on a day designated as a holiday by the University of Arizona. Upon approval by the clerkship director in advance, the holiday day may be substituted for a regular non-holiday workday. Clarify with the clerkship coordinator or director if it is required to report for weekend service following a holiday at the end of the week.

Procedure for Requesting and Tracking Absences

1. Requesting an excused absence:

• To request an excused absence, except in cases of personal illness, injury, or emergency, students must send an email to the clerkship director/clerkship coordinator no less than 30 days in advance of the anticipated absence. The reason for the absence (except for Personal Day Pass) and the date(s) of the absence must be included in the request.
• If a student requests an excused absence due to illness or injury, he/she will contact the clerkship director/clerkship coordinator as soon as possible. A note may be required from Campus Health or a primary care provider.

• The student must enter all absences in MedLearn. This applies to excused and unexcused absences (including Personal Day Pass).

• The clerkship director or coordinator will inform the student of his or her decision regarding the request for an excused absence by email.

• In the event of long term, serious medical or personal issues, the student should contact the Associate Dean for Student Affairs to request a leave of absence.

2. Tracking absences

The following indicates the maximum number of absences for clerkships of various lengths.

- .5 days for a 1-week course
- 1 day for a 2-week course
- 1.5 days for a 3-week rotation
- 2 days for a 4-week rotation
- 3 days for a 6-week rotation
- 6 days for a 12-week rotation

• If the number of absences exceeds the maximum allowed, the student will be required to repeat the clerkship.

• The Associate Dean for Student Affairs will review the student absence reports, and if a student exhibits a pattern of excessive absences, the student will be required to meet with the Associate Dean for Student Affairs to explain the reasons and discuss a plan for improvement in attendance.

• The Associate Dean for Student Affairs shall present the data from student absence reports to the Tucson Clinical Curriculum Subcommittee (TCCS) on an annual basis so that trends in the data can be noted and discussed.

Medical Student Duty Hours Policy

Instructors, faculty, and community preceptors share a responsibility to ensure that students are not working beyond the confines of the policy. The clerkship directors will be monitoring adherence of this policy via reports generated from student logging data. The specific duty hour policy is as follows: no more than 80 hours per week averaged over the clerkship period inclusive of all in-house activities; periods may be scheduled to a maximum of 24 hours of continuous duty in the hospital; no more than every fourth night on in-house call averaged over the clerkship period; and a minimum of one day free of duty per week averaged over a 4 week period. It is important that the students be aware of the signs of fatigue as well as be able to recognize in themselves and others the signs and symptoms of sleep deprivation.

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online.
Medical Student Duty Hours Policy

Approved by the TEPC, June 20, 2012
Amended, June 20, 2013
This policy is in effect beginning AY 2012-13

Relevant Accreditation Standard:

8.8 Monitoring Student Time

The medical school faculty committee responsible for the medical curriculum and the program’s administration and leadership ensure the development and implementation of effective policies and procedures regarding the amount of time medical students spend in required activities, including the total number of hours medical students are required to spend in clinical and educational activities during clerkships.

Rationale: This duty hour policy is created to parallel ACGME standards, with the understanding that medical students are supervised in all patient care activities and do not make independent patient care decisions. As a result, the duty hour policy for medical students follows ACGME stipulations for a PGY 2 resident and will support maximum educational benefit for students. The specifics of the PGY 2 duty hour time limits have been changed in the most recent ACGME iteration and are reflected in this policy change. This policy was modified to include new ACGME language recognizing the potentially impairing effects of sleep deprivation particularly in the area of student safety while driving home.

1. Duty hours for medical students must be limited to 80 hours per week, averaged over the clerkship period, inclusive of all in-house call activities.

2. Duty periods of students may be scheduled to a maximum of 24 hours of continuous duty in the hospital.
   - Clerkship directors must encourage residents to use alertness management strategies in the context of patient care responsibilities. Strategic napping, especially after 16 hours of continuous duty and between the hours of 10:00 p.m. and 8:00 a.m., is strongly suggested. It is essential for patient safety and medical student education that effective transitions in care occur. Students may be allowed to remain on-site in order to accomplish these tasks; however, this period of time must be no longer than an additional four hours.
   - Students must not be assigned additional clinical responsibilities after 24 hours of continuous in-house duty, but may remain for required formal learning activities such as noon conferences, scheduled didactic sessions, etc.
   - In unusual circumstances, students, on their own initiative, may remain beyond their scheduled period of duty to continue to provide care to a single patient. Justifications for such extensions of duty are limited to reasons of required continuity for a severely ill or unstable patient, academic importance of the events transpiring, or humanistic attention to the needs of a patient or family.
   - Medical students must have eight hours between scheduled duty periods. They must have at least 14 hours free of clinical duty after 24 hours of in-house duty.

3. Medical students must be scheduled for in-house call no more frequently than every-fourth night (when averaged over the clerkship period).
4. Medical students must be scheduled for a minimum of **one day free of all duty** every week. This can be averaged over 4 weeks only if there is a compelling educational need that has been approved by the CCS. At-home call cannot be assigned on these free days.

5. The sponsoring institution must have a process in place to allow for adequate sleep facilities or suggestions for alternate transportation if the medical student feels like driving home would dangerous.

The College of Medicine must:

- Educate all students to recognize the signs of fatigue and sleep deprivation;
- Educate all faculty members and students in alertness management and fatigue mitigation processes; and,
- Adopt fatigue mitigation processes to manage the potential negative effects of fatigue on patient care, learning and personal safety, such as strategic napping and personal strategies for safe transportation home.

### Documenting Duty Hours

Students are expected to record their duty hours. Students are exempted from this requirement while participating in clerkships that do not require call of any type.

**Required Clerkships:**

1. Students must complete recording of their duty hours by the last day of the clerkship.
   
   - Clerkship directors or clerkship coordinators will routinely review cumulative duty hours data and correct any systemic problems that prevent compliance with the stated duty hours policy.
   - Where students report a violation of duty hour limits, they will indicate the reason for that violation with the report.
   - Students will not be penalized for accurate reporting, nor will duty hours information be used to determine grades or for student evaluations.
   - Duty hour reports will be retained in the electronic database systems.
   - Grades will not be released until duty hours are reported by the student.

2. Where a breach of duty hours is noted in a student’s report, the clerkship coordinator will report that violation and its explanation to the clerkship director.
   
   - The director will make a determination as to whether the breach is acceptable per the guidelines set above.
   - Where reasons indicate an unacceptable violation of the duty hour limits per the guidelines set above, the director will contact the site director, or student’s supervisor to investigate and remediate those conditions leading to the violation.

3. Clerkship directors/ coordinators will be asked annually by the Educational Policy Committee to report on compliance with the duty hour policy.
Disability Resources

Disability Resource Center

Disability is an aspect of diversity that is integral to our society and to the University of Arizona campus community.

The Disability Resource Center collaborates with students, faculty and staff to create educational environments that are usable, equitable, sustainable and inclusive of all members of the university community. However, if a student encounters academic or physical barriers on campus, DRC staff is available to partner with the student in finding good solutions or to implement reasonable accommodations. Students who are granted DRC accommodations must still meet the core technical standards as defined in the Technical Standards for Medical Students.

Accessibility and Accommodations:

It is the University’s goal that learning experiences be as accessible as possible. If a student anticipates or experiences physical or academic barriers based on disability or pregnancy, please let the clerkship know immediately. Students are also welcomed to contact Disability Resources (520-621-3268) to establish reasonable accommodations.

Electronic Medical Record

Policy Statement:

A vital component of medical student education in preparation for residency is learning how to document patient care in the electronic medical record (EMR). In addition to allowing students to develop essential written communication skills, the practice of documenting patient encounters also allows students to:

1. Organize their thinking related to patient problems;
2. Demonstrate their clinical reasoning; and
3. More fully participate in patient care.

Providing guidelines for medical student interaction with an EMR is critical to medical student education. Student use of the EMR must be compliant with clinical affiliate policy guidelines with reference to both EMR documentation practices and billing.

Key Terms:

EMR – Electronic Medical Record
Copy/Paste Documentation – For the purpose of this policy, the term copy means any one of the following synonyms: copy and paste, reuse, and save note as a template. It also refers to an entry in the medical record that is exactly like or similar to previous entries. Copying is the process of carrying forward text in the record and pasting it in a new destination. Additionally, copying also occurs when documentation from one patient is the same as another, i.e., problem, symptoms, and treatment is identical.
Policy:

The following are expectations of medical students, residents, attending physicians, and clerkship administration in relation to medical student participation in the EMR.

Students:

- Must attend any required EMR trainings and abide by clinical site policies and procedures regarding EMR use.
- Students should create original documentation of patient care services in the medical record. The documentation must be created from the patient encounter and not be a copy of a previously documented encounter. Students should document only in the permissible areas of the record.
- Each student must be logged in under his or her own profile/access permissions when entering documentation into a medical record.
- Students are responsible for the security of confidential, sensitive, and protected patient information (electronic and paper-based). They must abide by HIPPA and other relevant policies. Students are prohibited from inappropriately sharing protected patient information including posting images or other patient information on social networking or other web-sites.

Residents/Attendings (teaching physicians):

- Teaching physicians should be familiar with their clinical sites’ guidelines on EMR documentation including what documentation can be used as part of billing.
- Teaching physicians should encourage medical student’s appropriate use of the EMR to document patient care.
- Teaching physicians should review the medical student’s notes and provide formative feedback for improvement of medical student performance.

Clerkship Administration:

- Clerkships will provide sufficient orientation to students about how to appropriately use the EMR at their clinical sites and how the documentation will be used so students understand how their documentation contributes to patient care and their learning.

Accreditation Standards:

7.8 Communication Skills

The faculty of a medical school ensure that the medical curriculum includes specific instruction in communication skills as they relate to communication with patients and their families, colleagues, and other health professionals.

9.3 Clinical Supervision of Medical Students

A medical school ensures that medical students in clinical learning situations involving patient care are
appropriately supervised at all times in order to ensure patient and student safety, that the level of responsibility delegated to the student is appropriate to his or her level of training, and that the activities supervised are within the scope of practice of the supervising health professional.

Office of Institutional Equity

INFORMATION FOR SUPERVISORS

The University of Arizona (UA) is committed to creating a work environment that is safe, inclusive, and free of discrimination and harassment. UA’s Nondiscrimination and Anti-harassment Policy prohibits discrimination on the basis of:

- Race
- Age
- Color
- Disability
- National Origin
- Veteran Status
- Sex
- Sexual Orientation
- Religion
- Gender Identity
- Genetic Information

If you supervise employees, contractors, agents or students, teach or advise students, or have management authority over a UA-sponsored program or activity, you have certain responsibilities under this policy. These responsibilities include:

- Promptly notifying the Office of Institutional Equity (OIE) if you are informed of or have a reasonable basis to suspect someone has violated the UA’s Nondiscrimination and Anti-harassment Policy;
- Promptly notifying the Dean of Students Office if the alleged policy violator and the person who is the subject of the conduct are students; and
- Engaging in appropriate measures to prevent violations of this policy.

You can file a formal complaint of discrimination with OIE within 180 days of the most recent incident of discrimination, in accordance with our Procedures. You can also contact the office anonymously if you would like to receive information or ask questions.

For more information, please see the list of Frequently Asked Questions.
Faculty Appointments

The following is a description of the process to obtain a faculty title so that preceptors may work with medical students at the University of Arizona College of Medicine-Tucson.

Qualifications:
- Preceptors should be board eligible or possess certification within their specialty. A current Arizona medical license (without restrictions) is required.

Document required from preceptor:
- A current CV. Any gaps in employment should be explained. Include a date of birth.

Supporting documents provided by the University of Arizona College of Medicine:
- Two letters of recommendation for associate faculty. Letters will be written by the Associate Dean, Curricular Affairs and the Assistant Dean, Curricular Affairs.
- One additional letter of recommendation is required for affiliate faculty (in Tucson, those who are full time employees of Banner, TMC or SAVAHCS).
- Letters from other sources that can speak to the preceptor’s teaching and educational interests are encouraged.

Once the documents have been collected, they will be forwarded to the respective clinical department for review and approval. These documents will then be sent to the Office of Faculty Affairs in the College of Medicine for final approval.

The last step is the Designated Campus Colleague (DCC) process. DCCs will receive (3) three emails which will be sent to their personal email addresses.
- The first two emails provide the Employee ID (Emplid), PIN and instructions for creating a NETID and a University of Arizona email account.
- The third email provides instructions for finalizing the DCC relationship in UAccess Employee-Self Service. The NETID steps should be completed before advancing to this last email.

At the conclusion of this process, the preceptor is eligible for benefits. These include a 10% discount on any in-store or phone purchases at the University of Arizona Bookstores using a CAT card, access to UpToDate, library access, and 10 free credits of continuing medical education available at The Virtual Lecture Hall. Please contact the assistant director, clinical education for more information regarding how to obtain these resources (520-626-3412).

For more information, see the Process for Vetting Community Faculty Preceptors (COM) at: http://medicine.arizona.edu/form/process-vetting-community-faculty-preceptors-com
Faculty Policies

Clerkship Directors & Site Directors Meetings and Site Visits

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online.

Clerkship Directors & Site Directors Meetings and Site Visits

Date of Approved Revisions: 9/5/2018
Effective Date: 9/5/2018

Purpose: Ensuring Adequacy and Comparability of Clinical Instructional Sites.

Article I. Definitions

a. Assistant Director, Clinical Education – The staff administrator in the Curricular Affairs Office responsible for assisting the Associate Dean for Curricular Affairs in providing oversight and management of the clinical clerkships

b. Associate Dean for Curricular Affairs – The senior administrator responsible for the oversight and administration of the undergraduate medical education program in partnership with the Tucson Education Policy Committee shared governance

c. Biennial – Every other year

d. Clerkship coordinator – Staff member charged to provide administrative support to the Clerkship Director in directing and overseeing and managing the program delivering in the clerkship

e. Clerkship Director – Faculty member charged with directing and overseeing the program delivery in the required clerkship for the sponsoring clinical department

f. Semi-Annual – Two times a year, usually once in the fall semester and once in the spring semester

g. Tucson Education Policy Committee (TEPC) – The COM-T permanent standing committee represents the general faculty in accordance with the General Faculty Bylaws and is charged with authority to oversee, revise, manage and evaluate the four-year medical education program leading to the MD degree.

h. Tucson Clinical Curriculum Subcommittee (TCCS) - The subcommittee of the TEPC is charged with the management and oversight of institutional features and processes involving the Clerkship and Transition to Residency years.

Article II. Scope, notification and implementation of policy

All clerkship directors who direct required clerkships in the undergraduate medical education program will implement semi-annual meetings and annual site visits to ensure comparable educational experiences and equivalent methods of assessment across all sites within a given rotation and during the duration of the clerkship to ensure that all medical students achieve the same medical education program objectives.
Article III. Required Semi-Annual Meetings
Clerkship Directors, all site directors/preceptors for each site to which students are assigned for the clerkship, and clerkship coordinators will meet semi-annually.

Section 3.01 Implementation
a. It is recommended that the meetings are held in November/December and again in May/June to inform/discuss changes needed during the current academic year and to prepare for the following year.
b. If the number of sites used precludes a single meeting with all clerkship leaders, clerkship directors and coordinators may instead meet with their site directors separately.
c. Meetings may be in-person, teleconferenced or video-conferenced, or a combination of these modalities.

Section 3.02 Data Review at Semi-Annual Meetings and Action Plan
a. Participants should be prepared to review and discuss data related to student performance, patient logs and clerkship management as well as student feedback on the clerkship, faculty and residents.
b. Any inconsistencies identified among sites impacting the quality of the learning experience of the current clerkship program will be addressed in a timely manner by the clerkship directors.
c. Directors may also collaborate with the Tucson Clinical Curriculum Subcommittees (TCCS) to find appropriate solutions to any issues involving coordination and consistency among sites.
d. Those changes impacting clerkship program structure, content and assessment methods will be proposed in the Clerkship Change Request form to the Tucson Education Policy Committee (TEPC) for approval.

Section 3.03 Meeting Documentation
a. These meetings will be documented via Clerkship Semi-Annual Meeting Report Form.
b. Clerkship Directors will submit the completed meeting forms to the Associate Dean for Curricular Affairs for the College of Medicine-Tucson and the Assistant Director, Clinical Education.

Article IV. Annual Clerkship Site Visits
Clerkship directors or designees will physically visit each clerkship site at least once a year. This will allow the directors or designees to assess directly the quality of the clerkship at all sites.

Section 4.01 Definition of Clerkship Site Visit Report Form
Clerkship Site Visit Report Form is a checklist confirming that the site and site faculty/preceptors have the facilities, resources and information required to deliver comparable learning experiences.

Section 4.02 Implementation
a. Clerkship directors or designees schedule an on-site visit to each clerkship site annually.
b. The review and completion of the Clerkship Site Visit Report Form provides the structure for the meeting between the clerkship director and site director.
c. If there are any deficits or concerns, those are noted on the form along with action steps to address the deficiencies.

Section 4.03 Annual Clerkship Site Visit Documentation
a. The annual clerkship site visits will be documented via the Clerkship Site Visit Report Form
d. Clerkship directors submit the Clerkship Site Visit Report Form to the Associate Dean for Curricular Affairs and the Assistant Director, Clinical Education.
Article V. Review of Findings

a. The Clerkship Semi-Annual Meeting Report Forms and the Clerkship Site Visit Report Forms will be reviewed by the Associate Dean for Curricular Affairs and the Assistant Director, Clinical Education in the Curricular Affairs Office.

b. The aforementioned forms will be forwarded to the Evaluation Subcommittee of TEPC and included as data in the “Quick Feedback” review as well as the biennial review of each clerkship as part of the program evaluation system to ensure that inconsistencies are addressed in a timely manner.

c. Members of the TCCS will also receive a copy of these reports.

Rationale
The College of Medicine-Tucson must assure compliance with LCME accreditation standards regarding the equivalence of learning experiences available across all sites of the clerkship. This policy/procedure also will help clerkship leadership maintain and improve the quality of clerkships, and will assist the TEPC in fulfilling its responsibility to provide oversight for the medical education program.

Relevant LCME Accreditation Elements
Excerpted from 2021-11 DCI-Full Survey Visit (edition November 2, 2020)

5.5 RESOURCES FOR CLINICAL INSTRUCTION
A medical school has, or is assured the use of, appropriate resources for the clinical instruction of its medical students in ambulatory and inpatient settings and has adequate numbers and types of patients (e.g., acuity, case mix, age, gender).

5.6 CLINICAL INSTRUCTIONAL FACILITIES/INFORMATION RESOURCES
Each hospital or other clinical facility affiliated with a medical school that serves as a major location for required clinical learning experiences has sufficient information resources and instructional facilities for medical student education.

5.7 SECURITY, STUDENT SAFETY, AND DISASTER PREPAREDNESS
A medical school ensures that adequate security systems are in place at all locations and publishes policies and procedures to ensure student safety and to address emergency and disaster preparedness.

5.11 STUDY/LOUNGE/STORAGE SPACE/CALL ROOMS
A medical school ensures that its medical students at each campus and affiliated clinical site have adequate study space, lounge areas, personal lockers or other secure storage facilities, and secure call rooms if students are required to participate in late night or overnight clinical learning experiences.

8.7 COMPARABILITY OF EDUCATION/ASSESSMENT
A medical school ensures that the medical curriculum includes comparable educational experiences and equivalent methods of assessment across all locations within a given course and clerkship to ensure that all medical students achieve the same medical education program objectives.
Orientation of Faculty and Residents to Clerkships

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online.

Orientation of Faculty and Residents to Clerkships
Approved: October 17, 2012

Relevant LCME Standards:

6.1 PROGRAM AND LEARNING OBJECTIVES
The faculty of a medical school define its medical education program objectives in outcome-based terms that allow the assessment of medical students’ progress in developing the competencies that the profession and the public expect of a physician. The medical school makes these medical education program objectives known to all medical students and faculty. In addition, the medical school ensures that the learning objectives for each required learning experience (e.g., course, clerkship) are made known to all medical students and those faculty, residents, and others with teaching and assessment responsibilities in those required experiences.

9.1 PREPARATION OF RESIDENT AND NON-FACULTY INSTRUCTORS
In a medical school, residents, graduate students, postdoctoral fellows, and other non-faculty instructors in the medical education program who supervise or teach medical students are familiar with the learning objectives of the course or clerkship and are prepared for their roles in teaching and assessment. The medical school provides resources to enhance residents’ and non-faculty instructors’ teaching and assessment skills, and provides central monitoring of their participation in those opportunities.

Rationale:

It is necessary for attending physicians and residents who participate in clerkship education to understand both the COM’s Educational Program Objectives (EPOs) as a whole as well as the learning objectives specified for the clerkships in each discipline. Knowledge of these objectives will help attending and resident educators to assure that students are receiving an appropriate educational experience and to modify that experience as necessary to achieve the stated objectives.

1. The Clerkship-Specific Student Manual will be distributed at the beginning of each academic year to all faculty and residents who will be participating in clerkship teaching.

Prior to the start of each academic year, leadership of each clerkship will send Curricular Affairs (CA) an updated Clerkship-Specific Student Manual as well as information on how to contact all faculty and residents who will be participating in clerkship teaching at all sites. It is anticipated that listservs will be utilized; special attention will be taken to include community-based faculty who may not be included on these listservs. CA will send all Tucson faculty members and residents a copy of the Clerkship-Specific Student Manual (containing COM EPOs and clerkship-specific learning objectives) as well as information on how to access objectives and policy regarding student performance assessment.
2. **The General Clerkship Instructor Manual**, containing policies and procedures pertinent to faculty/residents who teach in the clerkship curriculum (e.g., duty hour policy, mid-clerkship feedback policy, and timely submission of grades), will be distributed at the beginning of each academic year. This manual will be updated annually.

CA will send this manual at the beginning of the academic year to the same list of Tucson faculty and residents who will be participating in clerkship teaching at all sites. If new policies are implemented before the start of a new academic year, CA will send these policies to the list of faculty and residents as addenda to the orientation manual for faculty.

3. **All clerkship directors will provide orientations on their respective clerkships to faculty and residents at the beginning of each academic year.**

At the beginning of every academic year, the clerkship director will arrange to attend a residents’ orientation/other meeting and a faculty orientation/meeting to discuss the clerkship, review EPOs and clerkship objectives, review required clinical experiences for the clerkship, review strategies for student performance assessment and grading policies, and review other relevant policies.

---

**Faculty Instructional Development Policy**

The UA COM Faculty Instructional Development policy requires that all residents who teach medical students participate in two hours per year of training to develop or enhance their teaching and assessment skills. In the first year of residency, this training requirement is satisfied by attending the Residents as Educators Orientation in late June. Training is offered by Curricular Affairs; for more information, visit the web page for Residents as Educators.

The Faculty Instructional Development policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online.

---

**Policy for Faculty Instructional Development and Remediation for all Faculty**

Approved by the TEPC 06-17-2013

**Article I. Statement of Faculty Instructional Development Philosophy.**

**Article II. Scope, notification and implementation of policy.**

Section 2.01 Definition of faculty.

Section 2.02 Notification of faculty instructional development requirements.

Section 2.03 Implementation.

**Article III. Required faculty instructional development in Preclerkship years.**

**Article IV. Required Faculty instructional development in Clerkship years.**

Section 4.01 Orientation of faculty to teaching and assessment responsibilities.

**Article V. Requests or Referrals for additional faculty instructional development (remediation)**
Article I. Statement of Faculty Instructional Development Philosophy

The UA COM takes an active approach to developing and improving teaching and assessment skills of its faculty. Therefore, the UA COM education philosophy defines remediation as faculty instructional development and support.

Article II. Scope, notification, and implementation of policy

All faculty who teach medical students will be offered and encouraged to participate in faculty instructional development.

Section 2.01 Definition of faculty.

Faculty is defined as any faculty with a salaried or non-salaried position with the UA COM campus who teach medical students in Preclerkship or Clerkship years.

Section 2.02 Notification of faculty instructional development requirements

Adoption and publication of this policy to the faculty serves as notice of the requirements for faculty instructional development. In addition, reminders of these requirements shall be communicated annually in writing or by electronic means to all faculty subject to the requirements.

Section 2.03 Implementation

Each campus may establish its own procedure to implement this policy.

Article III. Required faculty instructional development in Preclerkship years

Faculty shall participate in instructional development for each method of teaching in which they will be engaged, as follows:

a. Facilitators for Case Based Instruction;
b. Facilitators for Team Based Learning;
c. Faculty who author Team-based Learning (TL) or Case Based Instruction sessions;
d. Faculty who serve as student mentors in the Societies program must participate in training as a Societies mentor and in a majority of the regularly scheduled mentor faculty development sessions.
Article IV. Required Faculty instructional development in clinical years

Section 4.01 Orientation of faculty to teaching and assessment responsibilities

All faculty teaching in clinical years (3 and 4) shall participate in an orientation to teaching to be conducted in a manner determined by the director(s) of the clerkship, selective, elective or other program in which they teach medical students.

Article V. Requests or Referrals for additional faculty instructional development (remediation)

Section 5.01 Requests for additional faculty instructional development

Any member of the faculty may submit a request for additional faculty instructional development support to the office that conducts faculty instructional development at their affiliated campus.

Section 5.02 Referrals for additional faculty instructional development

A block or clerkship director should refer a faculty member for additional faculty instructional development support when his or her performance as an educator falls below expectations as indicated by the average score on one or more core items on student, or peer or supervisor evaluations, or when a student has expressed reasonable concern about the faculty member’s teaching and/or assessment skills. Residents may be referred for faculty instructional development support or remediation as described in Article 6, below.

Article VI. Resident Instructional Development

Section 6.01 Orientation of residents

Residents who teach medical students in Preclerkship or Clerkship years are expected to participate in instructional development training for a minimum of two hours at the start of their residencies.

Section 6.02 Ongoing resident instructional development

For each subsequent year of residency, all residents are expected to complete a development session (in-person or online) focusing on teaching and assessment skills.

Section 6.03 Satisfaction of requirements

Unless otherwise specified in this policy, residents may satisfy these requirements by participating in department, campus or institution level instructional development activities or programs.

Section 6.04 Referring residents for additional faculty instructional development support

(i) Referral to Residency Program Director. Block directors or clerkship directors shall refer a resident to the resident’s site director and/or residency program director if the resident’s performance as an educator falls below expectations, as indicated by the average score on one or more core items on student, peer or supervisor evaluations, or when a student has expressed reasonable concern about the resident’s teaching and/or assessment skills.
(ii) **Referral to office conducting instructional development.** After conferring with the resident and, where applicable, the referring director, the Residency Program Director may, without undue delay, refer the resident to the Office of Medical Student Education.

**Section 6.05 Central Monitoring**

The UA College of Medicine campus or departments are not responsible to monitor attendance by residents at events they do not sponsor.

Each campus shall establish a procedure to centrally monitor compliance with this policy for resident instructional development to include the following:

(i) **At the beginning of each clinical year,** the Designated Institutional Officer (DIO), residency program directors or designees shall provide the affiliated campus office named in section 6.04(ii.) with a list of all residents in their residency program who teach medical students in a required COM clerkship, including resident emails and year in residency;

(ii) **During each clinical year,** the DIO named in Section 6.05(i) or their designee shall maintain records documenting resident participation in instructional development activities conducted by residency programs named in Section 6.05(i) or departments. If the College delivers the instruction, the College will keep records of attendance.

(iii) **On or before the close of each clinical year,** a designated administrator (Deputy Dean for Medical Student Education) will request the following each year from the DIO named in Section 6.05(ii):

a. A summary description of the resident instructional development activities at the institution, campus and department levels that were conducted at their respective institution.

b. A record documenting all residents’ participation in instructional development activities named in Section 6.05(iii.a).

(iv) The affiliated campus office named in section 6.04(1) shall compile a record documenting all residents’ participation in instructional development activities at the institution, campus and department levels, and forward a copy of this record to a) the Residency Program and/or Site Directors, b) the Office of Graduate Medical Student Education at the appropriate campus, and c) the Director of Faculty Development or Faculty Instructional Development.
Formative and Summative Assessment

Assessment of Student Performance

Faculty and resident assessment of student performance will be collected via the New Innovations online system. Summary assessment of student performance reports will be provided to students by Clerkship Coordinators after the end of the rotation and before grades are posted. All faculty and resident comments are de-identified in the report. All faculty and residents with whom students work will be requested to complete an online evaluation of the students in New Innovations. New Innovations uses a schedule matching system based on student rotations and dates of service that are the same as each of the faculty and residents. If there are questions about how evaluations are matched to faculty and residents, students should discuss the process with the Clerkship Coordinator.

Workplace Based Assessment

Workplace Based Assessment (WBA) is a reliable, valid form of assessment in use in medical education for over ten years. WBAs are used to provide regular assessments of student progress across Entrustable Professional Activities (EPAs). The transparency in student progress in clerkship, the autonomy provided to the student in seeking their own assessments and feedback, reduction in bias in grading, and alignment with our school’s competency-based education philosophy were all reasons approved at TCCS and TEPC committees to adopt WBAs for clerkship.

Students are required to be assessed on a minimum of 4 different EPAs during each clerkship. Students should only be assessed on the EPAs selected for that clerkship which is shown in Table 1. Failure to meet these WBA EPA requirements for a clerkship will result in receiving a grade of 0 and failing the clerkship.

See detailed information in the WBA Processes referenced later in this manual.

Mid-Clerkship Formative Feedback

A mid-clerkship assessment for each student is required. The mid-clerkship assessment will be completed by the Clerkship Director, Site Director or a designated faculty member at the student’s primary clinical site using the College of Medicine – Tucson Mid-Clerkship Assessment Form. This form includes performance criteria, as well as a portion for narrative comments. The student’s mid-clerkship performance must be reviewed in a one-on-one meeting with a Clinical Site Director or designee, and the student and Clinical Site Director or designee must sign the Mid-Clerkship Assessment Form as an acknowledgement of the assessment. The timing of the mid-clerkship assessment is during a specific window of dates as specified by policy and LCME.

Student Assessment of Clerkship, Site, and Instruction

Students must complete program evaluation surveys for each assigned site within a clerkship, the clerkship rotation as well as evaluations of attendings and residents in New Innovations. Clerkship grades will be withheld unless surveys are completed within two weeks of the clerkship’s end date.
Student feedback data is reported by Curricular Affairs to the clerkship directors in aggregate in the form of a composite, de-identified report twice per academic year in January and July. All student comments are also de-identified in the report.

If you have any questions, please consult with the Clerkship Coordinator or email Julie Sherwood, Assistant Director, Clerkship Education, clerkshipadmin@email.arizona.edu.

**Workplace Based Assessment Processes**

This section describes how students will collect assessments and the instructor role in the process.

A short video outlining WBA and the process is online at: https://www.youtube.com/watch?v=Hc7oFYqnWz8&list=PLnyL-0BNCHtJJTk7Zzqu3NeA_OqtnhrL6

**Faculty Development for WBA**

Training videos on giving feedback and on WBA for faculty and residents can be found on the Faculty and Instructional Development website:

https://fid.medicine.arizona.edu/content/workplace-based-assessment-clerkship-training

**Preparing Students for WBA: A Growth Mindset**

Curricular Affairs will be training learners that a key part of being successful is being able to receive feedback. In preparing for growth this year – and throughout their career - there are three skills:

1. Deliberate practice. Deliberate practice is pinpointing something specific to improve, and getting feedback on it. Watch this 3 min video from Dr Angela Duckworth, who explains how deliberate practice works: https://www.youtube.com/watch?v=5itYr20uUtk
2. Growth mindset. Feedback is only effective if you can receive it, and integrate it. Learn more about growth mindset in this 3-min orientation video: https://www.youtube.com/watch?v=_qlCa4LIabg
3. The third key step is grit. Grit is to persevere and be passionate over time; it is a quality of endurance over time. Your ability to stay engaged in your growth over time matters in clerkship – and throughout your career. Learn more about Grit from Dr Angela Duckworth (6 mins): https://www.youtube.com/watch?v=H14bBuluwB8

**Becoming Familiar with EPAs**

What are EPAs?

Entrustable Professional Activities (EPA) were published by the AAMC in 2014 as the activities all medical students should be able to perform upon entering residency, regardless of their future career specialty. EPAs
provide practical approach to assessing competence in real-world settings and impact both learners and patients.

For more information, visit [https://www.aamc.org/what-we-do/mission-areas/medical-education/cbme/core-epas](https://www.aamc.org/what-we-do/mission-areas/medical-education/cbme/core-epas)

**Which EPAs will students be assessed on?**

Throughout the Clerkship Phase, students will be assessed on 8 different EPAs which are listed below.

- EPA 1: Gather a History and Perform a Physical Examination
- EPA 2: Prioritize a Differential Diagnosis Following a Clinical Encounter
- EPA 3: Recommend and Interpret Common Diagnostic and Screening Tests
- EPA 5: Document a Clinical Encounter in the Patient Record
- EPA 6: Provide an Oral Presentation of a Clinical Encounter
- EPA 7: Form Clinical Questions and Retrieve Evidence to Advance Patient Care
- EPA 8: Give or Receive a Patient Handover to Transition Care Responsibility
- EPA 9: Collaborate as a Member of an Interprofessional Team

Each clerkship has agreed to assess students on a minimum of 4 different EPAs. It is important that students are aware of the EPAs that correspond to each clerkship so that they can meet the assessment requirements. The table below outlines the EPAs that will be assessed in each clerkship.

**Table 1. EPAs by Clerkship**

**WBA EPA Requirements**

Students are required to be assessed on a minimum of 4 different EPAs during each clerkship. Students should only be assessed on the EPAs selected for that clerkship which is shown in Table 1. Failure to meet these WBA EPA requirements for a clerkship will result in receiving a grade of 0 and failing the clerkship.
Grading for WBAs

A grade of “pass” is awarded for 35% of the grade when a student has completed:

- Minimum two WBA forms submitted for an average of two per week for each week of patient interaction in the clerkship block
- Minimum 4 different Entrustable Professional Activities (EPAs) seen by end of each clerkship block. Each clerkship director sets the specific EPAs and this must be documented and communicated to faculty and students.
- Minimum of 2 faculty members and 2 residents must complete WBA assessments for the learner. If no resident is present in a clinical block or rotation (e.g. rural rotations, some community clinic rotations), then only the attending assesses the learner a minimum of two times a week.

What constitutes “fail” in WBA:

- Not meeting the minimum in one or more WBA requirement(s), as listed above
- Being evaluated by an individual who is not an attending or resident (e.g. peer, friend, family member, etc). This constitutes academic dishonesty and is subject to the consequences outlined in the Honor Code policy, including academic dismissal.

Note: Grading for WBA is “all or none”. That is, students are awarded 35% for completing the minimum WBA requirements as outlined above and in the policy. If students do not meet the minimum by the end of the last day of the rotation, they are awarded 0% for this portion of the final clerkship grade. There is no remediation period.

How to Complete WBAs

1. Get the student’s unique form. There are two ways:
   a. Scan the students’ QR code using the photo function to scan the QR code. The student’s unique assessment form will appear on their web browser
   b. Open the email from the student. The URL to their unique assessment form will take you to the form.
2. Confirm with the student that the form has loaded on your device

3. Take a moment to reflect on what you have in common with the student. This helps reduce unconscious bias in grading.
4. **Confirm that the picture and student name on the survey is correct.**

5. **Ask the student which EPA they want to be assessed on. The EPA list is available on the form (page 2).**

6. **Observe and/or assist the student in completing the presentation, task or procedure.**

7. **Using the form, complete the assessment of the student*. You may use speech-to-text to enter in comments.**

8. **Before selecting Submit, to prevent student cheating, please enter in your email and title.**
9. Once submitted, a confirmation email will come to your inbox. If you receive a completed form but do not remember assessing a student, please email the Assistant Director of Clerkship, Julie Sherwood (clerkshipadmin@arizona.edu).

*Note that the assessment is done using the Modified Ottawa Scale and that a great Year 3 student is rated “I directed them from time to time”:

<table>
<thead>
<tr>
<th>Modified Ottawa scale: In supervising this student, how much did you participate in the task?</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. “I did it.” Student required complete guidance or was unprepared; I had to do most of the work myself.</td>
</tr>
<tr>
<td>2. “I talked them through it.” Student was able to perform some tasks but required repeated directions.</td>
</tr>
<tr>
<td>3. “I directed them from time to time.” Student demonstrated some independence and only required intermittent prompting.</td>
</tr>
<tr>
<td>4. “I was available just in case.” Student functioned fairly independently and only needed assistance with nuances or complex situations.</td>
</tr>
</tbody>
</table>

Should you encounter issues obtaining WBA assessments, please let the clerkship coordinator and/or director know, or the Assistant Director of Clerkship, Julie Sherwood (clerkshipadmin@arizona.edu), or the Associate Dean of Curricular Affairs (corralj@email.arizona.edu). The transition to a new form of assessment is a transition for all, and we are here to support everyone’s growth.

**WBAs and the Mid-Clerkship Formative Feedback Form**

How to complete the mid-point feedback form for each clerkship

In addition to the traditional questions on the Mid-Clerkship Formative Feedback Form, questions related to the WBAs have been added.

Students are required to have their dashboard loaded on a device (phone, tablet, laptop, etc.) and to filter their dashboard to correspond to the appropriate clerkship. Students will show their dashboard to the evaluator so that they can accurately complete this section of the form. If the student is concerned about
experiencing technical difficulties when presenting the dashboard, they can provide screenshots of the dashboard within 24 hours prior to the meeting and present the still image.

A sample of the WBA-related questions on the Mid-Clerkship Formative Feedback Form is provided below:

**WBA Frequently Asked Questions**

*Why are we doing WBA?*

WBA is a reliable, valid form of assessment in use in medical education for over ten years. WBAs are used to provide regular assessments of student progress across Entrustable Professional Activities. The transparency in student progress, the autonomy provided to the student, reduction in bias in grading, and alignment with our school’s competency-based education philosophy were all reasons approved at TCCS and TEPC committees to adopt WBAs for clerkship.

*How are Students Coached to Ask Faculty and Residents to complete a WBA?*

Asking for feedback is a natural part of our professional days, and a key tool in our professional growth. Acknowledging the power differential between students and faculty, fellows, or residents, there are several resources to assist with this: [https://www.youtube.com/watch?v=Hc7oFYqnWz8&list=PLnyL-0BNChtJTk7Zzu3NeA_OgtnhrL6](https://www.youtube.com/watch?v=Hc7oFYqnWz8&list=PLnyL-0BNChtJTk7Zzu3NeA_OgtnhrL6).

In addition, students will have a practice session in Transitions to Clerkship.

*How will students and I know how well they are doing on achieving the minimum requirements?*

The dashboard is available to clerkship leadership and students at all times to search and review progress to date. Midpoint clerkship meetings should incorporate a time to focus on if students are meeting the minimum requirements, and discuss a plan on how to they can achieve the requirements.

*Do WBAs need to be completed in the first week of a clerkship block?*

For clerkships starting with a week of virtual learning, simulation or other activities, students are not responsible for 2 WBAs that week, though they may choose to use simulation events as a way of practicing asking for feedback using the WBA form. That is, the average of 2 WBAs per week applies only to the number of weeks focused on patient encounters.

*Can a student complete WBAs all in one week or in a shortened time in the clinical interaction weeks?*
No. The point of WBAs is to continually seek feedback and show growth over time. Students therefore need to be collecting WBAs across each week of clinical interaction within a clerkship block.

*What if a student misses one WBA in a week? Can they make it up?*

There are no formal WBAs labelled “make up” WBAs. As per policy, students must complete an average of 2 WBAs for each week of patient interaction throughout each clerkship. Additionally, as a key reason for WBAs is showing a growth in your abilities over time, students need to be collecting WBAs across each week of clinical interaction within a clerkship block.

*Can a student make up WBAs after a clerkship block has finished?*

Students cannot make up WBAs after the clerkship has finished. “Extra” WBAs completed in one clerkship cannot roll over to another clerkship. Failure to meet the minimum requirement of 2 per week of patient encounters within the clerkship block will result in a grade of a 0.

*What if a student doesn’t complete the minimum required WBAs, EPAs, or variety of assessors?*

As per policy, students would receive a grade of 0 for this part of the clerkship grade.

*Who do I contact if I need help with the WBA form or dashboard?*

Please email WBAAdmin@email.arizona.edu with any technical issues regarding the WBA form or dashboards.

---

**Grading and Progression**

---

## Educational Program Objectives

The Educational Program Objectives are based on the ACGME six core competencies: Patient Care, Medical Knowledge, Practice-based Learning and Improvement, Interpersonal and Communication Skills, Professionalism, and Systems-based Practice and Population Health. The objectives, as approved by the general faculty and the Educational Policy Committee, are important to the understanding of our medical students’ educational progression throughout the four years and we ask that you be familiar with them as you teach.

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online.

*In the following competencies and objectives diversity is understood to include race, sex, ethnicity, culture, ability, disability, socioeconomic status, education level, language, religion, spiritual practices, sexual orientation, gender identity, geographic region, age, country of origin, education and genetics.*

### Patient Care

Graduates obtain appropriate histories; perform skillful, comprehensive and accurate patient examinations; and develop appropriate differential diagnoses and management plans. Graduates will recognize and understand the principles for managing life-threatening situations. They will select, perform and accurately interpret the results of laboratory tests and clinical procedures in order to provide patient-centered care that results in high-quality outcomes. Graduates will be able to:
• Obtain an accurate medical history that covers all essential aspects of the history
• Perform both a complete and an organ system specific examination
• Identify appropriate diagnostic procedures, perform those commonly used, and correctly interpret the results
• Reason deductively and efficiently to reach a diagnosis for patients with common medical conditions
• Outline an optimal plan of management for patients with common medical conditions, and describe prevention plans for common conditions
• Recognize patients with immediate life threatening conditions regardless of etiology, and institute appropriate initial treatment
• Demonstrate knowledge of the principles of rehabilitation, long-term care, and palliative and end-of-life care
• Provide appropriate care to all patients, regardless of any individual characteristics, background, or values
• Provide health care services as well as health education that empower patients to participate in their own care and that support patients, families, and communities in preventing health problems and maintaining health

Medical Knowledge

Graduates apply problem solving and critical thinking skills to problems in basic science and clinical medicine. They demonstrate knowledge about (1) established and evolving core of basic sciences, (2) application of sciences to patient care, and (3) investigatory and analytical thinking approaches. Graduates will demonstrate their knowledge in these specific domains:

• Core of basic sciences
• The normal structure and function of the body as a whole and of each of the major organ systems
• The molecular, cellular and biochemical mechanisms of homeostasis
• Cognitive, affective and social growth and development
• The altered structure and function (pathology & pathophysiology) of the body/organs in disease
• The foundations of therapeutic intervention, including concepts of outcomes, treatments, and prevention, and their relationships to specific disease processes
• The many and varied social determinants of health and disease
• The legal, ethical issues and controversies associated with medical practice
• Critical thinking about medical science and about the diagnosis and treatment of disease
• The scientific method in establishing the cause of disease and efficacy of treatment, including principles of epidemiology and statistics
• The effective use of information technology to acquire new information and resources for learning

Practice Based Learning and Improvement

Graduates are prepared to practice medicine today and in the future within the context of society and its expectations. They use evidence-based approaches, demonstrating proficiency with information retrieval and critical appraisal of the medical literature to interpret and evaluate scientific and patient care information. They are dedicated to continuous learning within the science of healthcare delivery. They understand the limits of their own personal knowledge, remediate inadequacies to remain current, and integrate increased self-knowledge into their daily activities. At the time of graduation, students have not yet established a practice but nonetheless will demonstrate an awareness of and an understanding of general principles for:

• Identifying strengths, deficiencies and limits in one’s knowledge and expertise
• Identifying and performing learning activities that address gaps in one’s knowledge, skills, or attitudes
- Incorporate feedback into clinical practices
- Remaining informed about new, most current practices on national and international levels
- Locating, appraising, and assimilating evidence from scientific studies related to clinical care
- Participating in the education of patients, families, students, trainees, peers, and other health professionals
- Obtaining information about the populations and communities from which individual patients are drawn and applying it to the diagnosis and treatment of those patients
- Understanding the population, background, socio-economic, and community factors that can affect health and health care delivery for individual patients
- Identifying and critically analyzing the role and cost-benefits of guidelines, standards, technologies, and new treatment modalities for individual patients
- Describing the causes and systemic approaches to prevent medical errors and provide a safe environment for patient care

**Interpersonal and Communication Skills**

Graduates demonstrate interpersonal and communication skills that result in the effective information exchange and collaboration with patients, their families, and health professionals. They use effective communication skills with patients, families, and the community to educate and promote health and wellness. Graduates will demonstrate the ability to:

- Develop a meaningful therapeutic and ethically sound relationship with patients and their families across diverse backgrounds
- Effectively communicate with patients and families by understanding and appropriately responding to emotions, using listening skills, nonverbal, explanatory, questioning and writing skills to elicit information and manage interactions
- Document and present patient data and clinical information in an organized, accurate, legible and/or verbally clear manner
- Encourage patients’ health and wellness through appropriate health education
- Engage in collaborative communication when working within a team of one’s profession or as part of an interprofessional team

**Professionalism**

Graduates are committed to carrying out professional responsibilities, demonstrating compassion, adhering to ethical principles, and are sensitive to diverse patient populations. Graduates respect patients, families, and professional colleagues and are advocates for improving access to care for everyone. Graduates will exemplify a professional character that exhibits:

- Compassion, integrity, and respect for others
- Respect for patients’ autonomy, privacy, and dignity
- Respect for patients’ race, sex, ethnicity, culture, ability, disability, socioeconomic status, education level, language, religion, spiritual practices, sexual orientation, gender identity, geographic region, age, country of origin, education and genetics
- Integrity, reliability, dependability, truthfulness in all interactions with patients, their families and professional colleagues
- A responsiveness to patient’s needs and society that supersedes self-interest
- The skills to advocate for improvements in the access of care for everyone, especially vulnerable and underserved populations
• A commitment to excellence and on-going learning, recognizing the limitations of their personal knowledge and abilities, and the capacity to effectively address their own emotional needs
• Knowledge of and a commitment to uphold ethical principles in such areas as the provision of care, maintaining confidentiality, and gaining informed consent
• An understanding of and respect for the contributions of other health care disciplines and professionals, and appropriate participation, initiative and cooperation as a member of the health care team

**Systems-based Practice and Population Health**

Graduates demonstrate awareness of and responsiveness to the context and system of health and healthcare. They recognize health disparities and are able to effectively call on system resources to provide optimal care. Graduates are able to work with patients both as individuals and as members of communities and take this into account when performing risk assessments, assessing symptoms, diagnosing illnesses, making treatment plans and considering the patient care and systems-level implications of their work. Graduates will demonstrate:

• An understanding of how patient care and professional practices affect health care professionals, the health care organization, and the larger society and how these elements of the system affect their own practice
• An understanding of factors involved in healthcare disparities and how to optimize care for vulnerable or underserved populations
• Knowledge of how types of medical practice and delivery systems differ from one another
• An understanding of how to practice cost-effective health care and resource allocation that does not compromise quality of care
• Advocacy for quality patient care and access for all people, including the underserved, and a commitment to assist patients in dealing with system complexities
• The capacity to partner with health care managers and health care providers to assess, coordinate and improve health care and knowledge of how these activities can affect system performance
• An understanding of the physician’s role and responsibilities to promote the health of the community and the underlying principles of preventive medicine and population-based health care delivery
• The ability to acquire relevant information about the health of populations or communities and use this information to provide appropriate services
• The ability to appropriately mobilize community-based resources and services while planning and providing patient care

**Overarching Clerkship Expectations**

The clerkship experiences at the University of Arizona College of Medicine Tucson campus are intended to expand students’ breadth of knowledge of medicine based on the foundation of their Preclerkship training at our institution. The clerkships are full-time learning experiences and Curricular Affairs works closely with each department to identify, recruit, and maintain a wide array of sites that offer a range of individualized learning experiences around a core set of goals and specific patient encounters.

Learning experiences are unique to each individual and it is important to understand the learning process can and does occur through many avenues. Both passive (i.e. observing and/or shadowing) and active learning (i.e. hands on) serve the educational mission and provide students with the necessary skills to become a safe and
effective future physician. At any given site, we have a diverse array of learners, including residents; therefore, hands on participation is often not possible. While it is unlikely that students will actually perform a laparoscopic appendectomy or deliver a baby without assistance, learning is occurring while holding the laparoscopic camera and by observing the birth process. Expectations on the clerkships need to be realistic in light of the learning environment and the presence of other learners. Much can be gained by a positive attitude, a desire to learn, and focused observation.

**Technical Standards**

To ensure that incoming medical students are able to complete the entire curriculum established by the College of Medicine, the College requires that each student be able to meet the technical standards defined in this document.

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online.

**Technical Standards for Medical Students**

A candidate for the M.D. Degree must demonstrate proficiency in five key areas for technical standards: (1) intellectual-conceptual abilities, (2) behavioral and social attributes, (3) communication, (4) sensory/observation, and (5) motor capabilities.

At each stage of the M.D. Degree Program – including ADMISSION, RETENTION, AND GRADUATION – students must possess the capability to complete, with or without reasonable accommodation, all aspects of the current curriculum.

**Intellectual-Conceptual Abilities**

A student must be able to problem solve rapidly. This critical skill demanded of physicians requires the ability to learn and reason, and to integrate, analyze, and synthesize data concurrently in a multi-task setting. In addition, the student must be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures. A student must be able to measure, calculate, reason, analyze, integrate, and synthesize in the context of the study of medicine. The student must be able to comprehend extensive written material. A student must also be able to evaluate and apply information and engage in critical thinking in the classroom and clinical setting. A student must be able to effectively learn, participate, collaborate and contribute as a part of a team. A student will need to synthesize information effectively both in person and via remote technology. A student must be able to consider alternatives and make decisions for managing or intervening in the care of a patient.

**Behavioral and Social Attributes**

A student must possess the ability to exercise good judgment, and to complete all responsibilities attendant to the diagnosis and care of patients and families. In addition, a student must maintain mature, sensitive, and effective and harmonious relationships with patients, students, faculty, staff, and other professionals under highly stressful situations. A student must have the ability to function effectively under stress and to adapt to an environment that may change rapidly without warning and/or in unpredictable ways. The student must be able to exhibit empathy, integrity, and concern for others and must interact with patients and their families,
health care professionals, colleagues, faculty, and staff in a courteous, professional, and respectful manner. Students are expected to understand the legal and ethical aspects of the practice of medicine and function within the law and ethical standards of the medical profession.

Communication
A student must communicate effectively, sensitively, and rapidly with other students, faculty, staff, patients, family, and other healthcare professionals. A student must demonstrate a willingness and ability to give and receive feedback. A student must be able to: convey or exchange information at a level allowing development of a health history; identify problems presented; explain alternative solutions; and give directions during treatment and post-treatment. The student must be able to process and communicate information on the patient's status with accuracy in a timely manner to members of the healthcare team. A student must be able to elicit information from patients, describe changes in mood, activity, and posture, and perceive nonverbal communications.

Sensory/Observation
A student must be able to acquire the information presented through demonstrations and experiences in the basic and clinical sciences. A student must be able to observe a patient accurately, at a distance and close at hand (including in virtual/telemedicine settings) and observe and appreciate non-verbal communications when performing clinical assessment and intervention or administering medications. The student must be capable of perceiving the signs of disease and infection as manifested through physical examination. Such information is derived from images of the body surfaces, palpable changes in various organs and tissues, and information communicated by patients and body functions. The student must be able to adhere to the standards of patient assessment and standards of care, including the use of technological equipment.

Motor Capabilities
A student should have sufficient motor function to execute movements required to provide general care and treatment to patients in all health care settings. Students must be able to elicit independently information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. A student must be able safely to execute motor movements reasonably required to provide general care and emergency treatment to patients.

Disability Resources
Students with disabilities should contact the Disability Resource Center to request accommodations. Given the clinical nature of medical education, additional time may be needed to implement accommodations. Timely disclosure and requests by students are essential and encouraged.

Disability Resource Center

Grading and Progression Policies
The grade in a clerkship is based on a student’s performance in the six competencies. The final grade is a composite grade, using a formula designed by each clerkship director, the common assessment form, test
scores, and other evaluation tools. The composite clerkship grade is divided into four categories: Honors, High Pass, Pass, or Fail (H, HP, P, F). The medical knowledge examination will account for 15% of the composite grade. The composite grade for each clerkship will be determined at the departmental level.

*The policy below includes only the Clerkship years and is subject to periodic updating. The most recent version will always be found online. The policy in its entirety (years 1-4) can be found online using the link.*

Assessment of Student Performance

APPROVED September 16, 2009
October 17, 2012, June 20, 2013

Educational Policy Committee
Policies take effect July 1, 2010, except where noted otherwise in this document

Section Two: Grading and Progression Policies for Academic Years 3 and 4

A. Required Survey Completion – Years 3 and 4 Student Feedback Surveys

Approved date: October 16, 2013

Policy Statement: Students must complete program evaluation surveys for each assigned site within a clerkship and for all electives supervised by UA faculty. Clerkship and electives grades will be withheld until the surveys are completed.

Rationale: Student feedback surveys have, heretofore, been voluntary contributions by students to program evaluation. Typically, response rates are high in the early years, but become lower as students progress through the curriculum. Student feedback is critical to the evaluation of the program and is a major requirement for accreditation. It has been affirmed that, for the purposes of program evaluation for the college, students are required to complete evaluation surveys in Years 3 and 4. This policy establishes that requirement.

B. Protocols and Standards for Delivery of Year 3 Exams

Approval Date: December 3, 2014
Effective Date: 6/30/2014

Policy statement: This policy establishes the protocols and standards for students in Year 3 who will use the online National Board of Medical Examiners (NBME) shelf examination system and the ExamSoft examination system (during Intersessions) for graded and non-graded assessments. The following policy is in place in an effort to ensure that students have efficient, fair and positive experiences on assessment days.

Key Terms:
- Shelf exam – end of core clerkship examination
• ExamSoft – the electronic exam system used by the UA COM as of Academic Year 2014-15
• SofTest – the software provided by ExamSoft that is loaded onto student devices

NBME Shelf Exam
1) All clerkships administer the NBME Shelf Exam (electronic) on the last day of each rotation to all students as a group to ensure uniform testing procedures and conditions.
2) Coordinators from each clerkship will be present to proctor.
3) The time allotted for the exam is 2 hours and 45 minutes.
4) Each student will take the electronic shelf exam using his/her laptop. It must be fully charged before activity and the student must bring the device charger.
5) No programs or software can be opened or accessed during the assessment period.
6) Prior to test day an email will be sent to students with instructions to run an exam compatibility check (URL is http://wbt.nbme.org/exam). Please see your clerkship manual for details regarding the procedure.
7) Students should consult with the IT Help Desk (626-8721) should technical assistance be required.
8) Students should arrive no later than 30 minutes prior to the start of the exam.
9) If a restroom break is needed during the examination, click the Pause button at the bottom of your screen. A screen saver will appear. However, this pause does not stop the timer for the exam. Students will be escorted one at a time to the restroom.
10) If the screen freezes, raise your hand and a proctor will assist you.
11) Students will be provided with scratch paper to make notes or calculations once the exam begins. These will be collected at the end of the examination session.
12) Before the exam begins, students should be sure no unauthorized personal items and/or devices are in the testing room. These items include, but are not limited to the following:
   a) Cell phones
   b) iPods/ iPads
   c) Watches with alarms, computer or memory capability
   d) Calculators
   e) Paging devices
   f) Recording/filming devices
   g) Reference materials (book, notes, papers)
   h) Backpacks, briefcases, or luggage
   i) Beverages or food or any type
   j) Coats, outer jackets or headwear

   1. SYSTEM REQUIREMENTS FOR LAPTOPS

   For the most current guidelines, refer to your clerkship manual.

   2. EXAMSOFT

   1) Electronic testing software (SofTest) must be pre-loaded and registered on the student’s preferred testing device (iPad or laptop).
   2) The student must come prepared with session files already downloaded on his/her preferred testing device. The student must download all available session files.
   3) The testing device must be fully charged before activity. The student must bring the device charger.
   4) No programs or software can be opened or accessed during the assessment period.
   5) Scratch Paper will be distributed by the proctors. The student is not permitted to have scratch paper in his/her possession until it is provided by the proctor. All scratch paper must be returned to the proctor at the end of the assessment for secure disposal.
6) Coats, large/oversize/bulky jackets, and hats must be removed before entering the room. Head gear will only be allowed for religious purposes. Glasses that obscure the eyes are not permitted to be worn in the classroom.

7) Please review the “University of Arizona Disruptive and Behavior in an Instructional Setting” for further applicable policy information on expected behaviors in the learning environment at: https://policy.arizona.edu/education-and-student-affairs/disruptive-behavior-instructional-setting

8) Please review the “Procedures for Student Progress, Academic Integrity, and Managing Grade Appeals at the University of Arizona College of Medicine” policy for grade appeals at: http://medicine.arizona.edu/form/procedures-student-progress-academic-integrity-and-managing-grade-appeals-com.

C. Grading Policies for Transition to Clerkship Course

Approved: June 15, 2011
Revised: June 20, 2012

1) The two grades available for this course are Pass and Fail.
2) The student's grade is based on his/her attendance and participation.
3) The Attendance Policy must be followed, which means a student must receive approval from the campus Associate Dean of Student Affairs for any absence in the course.
4) If a student has an excused absence for a session, the student must arrange with the course director to make up the session.
5) An unexcused absence can result in a failure of the course at the discretion of the course director.
6) A student may not progress in Year 3 until s/he passes the Transition course.

D. Grading in Clerkships
Revised and Approved February 3, 2021

1) The grade in a clerkship is based on a student’s performance in the competencies.
2) The grade is a composite grade, using workplace-based assessment, the clinical assessment form, test scores, and other evaluation tools that are approved by the TEPC.
3) Once a clerkship grade is submitted, no change to the grade will be made even if additional performance evaluations are submitted regarding the student.
   a) Exception: if the student is on a community clerkship site and there is only one evaluator, a grade of incomplete (I) is recorded until the evaluation is received.
4) A mid-clerkship assessment for each student is required. This assessment is based on the Mid-Clerkship Formative Feedback form and workplace-based assessment dashboard approved by the TEPC. The student’s performance must be reviewed in a face-to-face meeting with a clinical instructor, and the student and clinical instructor must sign the Mid-Clerkship Formative Feedback form.
5) The composite clerkship grade is scored on a four-point scale: Honors, High Pass, Pass, or Fail (H, HP, P, F).
   a) The composite grade is comprised of three components. These three components sum to 100% of the total grade:
      i) Summative medical knowledge exam component: 15% of the composite grade.
         (1) Each clerkship will set the minimum passing score on its exam.
         (2) The test must be an NBME shelf exam or self-designed.
ii) Clerkship activities component (e.g., case presentations, professionalism, etc.): 15% of the composite grade.

(1) The activities are set by the clerkship director and must be approved by TCCS and TEPC using the clerkship change form
(2) These activities must be clearly and transparently communicated to faculty, residents, and students at orientation to the rotation, and in the clerkship handbook.

iii) Clinical and Workplace-based assessment component: 70% of the composite grade.

(1) The clinical assessment form accounts for 35% of the Clinical and Workplace-based assessment component. The comments on the clinical assessment form must incorporate specific narrative examples of the competencies being assessed that aligns with and clearly conveys the overall grade of H, HP, P, or F.

(2) The Workplace-based assessment (WBA) form accounts for 35% of the Clinical and Workplace-based assessment. In order to receive a grade of 35%, a student must complete:
   (a) Minimum of two WBA forms submitted for an average of two per week for each week of patient interaction in the clerkship block.
   (b) Minimum of four different Entrustable Professional Activities (EPAs) seen by end of each rotation. Each clerkship director sets the specific EPAs and this must be documented and communicated to faculty and students.
   (c) Minimum of two faculty members and two residents must complete WBA assessments for the learner. If no resident is present in a clinical rotation (e.g., rural rotations, some community clinic rotations), then only the attending assesses the learner a minimum of two times per week.
   (d) Workplace-based assessment will be graded as 0% for either or both of the following conditions:
      (i) A student does not complete the minimum in one or more of the minimum requirements as outlined in section (iii)(2)
      (ii) A student is evaluated by someone other than the faculty or resident in the rotation (e.g., peer, friend, family member, etc.). This constitutes academic dishonesty and is subject to consequences outlined in the Honor Code Policy.
   (e) The grading for a WBA is pass/fail. Students are awarded 35% for WBA for completing the minimum requirements. If a student does not meet the minimum requirements, that student will receive 0% for WBA and will fail the clerkship.

b) The composite clerkship grade of “Honors” is awarded to students with composite grades in the top 25% of all student scores. “High Pass” will be awarded to those students whose score falls in the top 26-50% and meets one of the following conditions:
   i) Excelled in either the exam or the clinical grade but not both, or
   ii) Who is outstanding in all areas and is close to an Honors score, but does not achieve it.

c) TCCS will annually review procedures for determining Honors and High Pass and revise as needed.

d) A student must achieve minimum “Meets Expectations” assessment in every competency on the clinical assessment form in order to receive either a P, HP, or H for the clerkship. Receiving “Below Expectations” or “Far Below Expectations” in any competency will result in a failing grade in the clerkship.

e) The clerkship director is responsible for final determination of each student’s grade. The comments submitted with the final grade must incorporate specific narrative examples of the competencies
being assessed that aligns with and clearly conveys the overall grade of H, HP, P or F. All final composite grades and comments must be submitted within six weeks of the rotation block ending. All grade changes following the posting of the final grade must follow the Grade Appeal Policy.

6) If a student fails a clerkship exam, the student will have one opportunity to retake the exam.
   a) If a student needs to schedule a retake clerkship exam during Year 3, the exam must be scheduled at the next Winter or Spring academic break.
      i) The ‘next’ break will be determined by the timing of the results of the 1st exam and the time it takes to order a new exam.
   b) A retake clerkship exam cannot be scheduled during a clerkship, Intersessions, or the third year elective block.
   c) If a student needs to schedule a retake clerkship exam during Year 4, the student will arrange his/her schedule to accommodate a week without curricular requirements and will schedule the retake clerkship exam at the end of that week.
   d) **In effect with the Class of 2021:** A student who requires retake exams in two clerkships in one academic year may meet the conditions for academic probation. Refer to Section Four: Academic Probation.
   e) A student who fails a second clerkship exam before completing the retake clerkship exam for a previous failure must stop academic progress and meet with the Student Progress Committee to agree on a plan for the student to complete the retake clerkship exams. If a student must schedule multiple retake clerkship exams, the student must pass all exams before resuming clinical training.

7) A student who passes a clerkship subsequent to passing a retake clerkship exam will receive a grade of Pass for the clerkship. In circumstances in which a retake clerkship exam is required, a student is not eligible for a final clerkship grade of Honors or High Pass.

1) If a student fails a clerkship retake exam, the student will receive a grade of Fail in the clerkship and will be required to repeat the clerkship. A student who is repeating a clerkship must complete all components and requirements for the clerkship regardless of whether the student completed those components during the initial attempt at the clerkship; previous work cannot be resubmitted. Students repeating a clerkship are eligible for final clerkship grades of “Honors” and “High Pass.”

**E. Intersessions Grading**

1) Intersessions is a single course consisting of one or more weeks that are distributed through the year(s). Student performance in the weeks of the course is combined into a single grade that is recorded on the transcript at the end of the course.
   a) The grade can be either Pass or Fail.
   b) Assessment is based on performance in each competency.
   c) The final grade in each competency is awarded at the end of the course.
   d) If a student receives an Unsatisfactory in any competency, the student has failed the course.
   e) Each student’s current performance in the competencies will be posted in MedLearn or E*Value, so that at the end of a week, the student can be informed of his/her status in the course.
   f) If a student’s performance in an Intersessions week is unsatisfactory, the student must meet with the course director to plan for improved performance in the next Intersessions week.

2) Attendance is required at all activities.
   a) The campus Associate Dean for Student Affairs, in consultation with the course director, must approve any absence.
b) If a student has an excused absence for a session, the student must arrange with the course director to make up the session.

c) An unexcused absence can result in a failure of the course at the discretion of the course director.

3) The MK competency is based on exams, administered at the end of Intersessions week(s).
   a) If there is more than one exam, each exam will contribute equally towards the final MK grade.
   b) If at the end of the course, the student has not met the criteria for satisfactory performance in MK, s/he will be offered one opportunity to take another examination, called a retake exam.
   c) The retake exam will be comprehensive, covering Intersessions material addressed across the week(s).
   d) The retake exam will be scheduled by the course director in consultation with the Associate Dean of Student Affairs. The retake exam will be scheduled within 4 weeks after the end of Intersessions.
   e) Passage of the retake exam will result in satisfactory performance in the MK competency.
   f) Failure of the retake exam will result in unsatisfactory performance in MK and therefore failure of the Intersessions course.

4) If a student fails the Intersessions course, the student must repeat the Intersessions course in Year IV.
   a) The student will designate week(s) in his/her 4th year that is/are equivalent to the duration of the Intersessions course. During that time, the student cannot be enrolled in other medical curriculum courses.
   b) The student will be required to submit one to three papers on topics decided by course director. The topics will cover broad integrative content areas from the Intersessions course.

   c) The student will be expected to review relevant podcasts, MedLearn posted materials from the Intersession course, as well as the student will be required to research additional information from literature sources (articles, textbooks, etc.).
   d) The paper will be evaluated by relevant faculty and given a grade of Pass/Fail. The paper(s) should be scholarly and include references.
   e) The student will also be required to discuss and defend the ideas in each of his/her papers to the faculty who graded the paper in an oral examination. The grade for the oral examination will also be Pass or Fail.
   f) The student can receive either a Pass or Fail grade for the repeat of the Intersessions course and must pass both the written and oral presentations.
   g) If a student fails the repeat of the Intersessions, it will be a second failure of the same course and the student would be automatically dismissed, following the policies established by TEPC 7/1/10.

F. End-Of-Year 3 OSCE Examination

Approved: March 17, 2010
Revised: June 20, 2012

Rationale: In order to have the end-of-Year 3 OSCE exam results more closely reflect potential performance on USMLE Step 2-CS and to assure an appropriate level of clinical competence, the TEPC examined changing the grading for the University of Arizona College of Medicine end-of-Year 3 OSCE exam. Grading of the exam was discussed and the following policies regarding grading of the end-of-Year 3 OSCE exam were approved by the committee. Starting with the Class of 2011:

1) Students must independently pass the Arizona Clinical Interview Rating (ACIR) and Database Development components of the end-of-Year 3 OSCE exam. The passing score on each component shall be 65%.
2) Students are strongly advised to take USMLE Step 2-CS no later than December 31 of their final academic year.

G. Grading Policies for Electives

Rationale: In order to explain the rationale for grading in electives it is helpful to consider their unique educational purpose and format. Their purpose is to enable a student to pursue areas of interest, which is quite different than other courses, which are designed to teach fundamental skills, that all students are expected to master.

- Each student’s Year IV curriculum is individualized to meet his/her educational and career needs. An advisor designated by each campus will approve the specific selection and enrollment of electives.
- An elective period has been scheduled during Year III to provide students with an early experience within a specialty that the student may be considering for a career.
- A “clinical” or “patient-care” elective is a medical training experience that involves direct patient contact, and is expected to provide the student with structured, individualized education, training, or experience in some branch of medicine. These electives require, at a minimum, 40 hours per week commitment.
- A “non-clinical” or “non-patient-care elective” is any course that does not involve direct patient care and may include research, independent study, seminars or on-line courses.

1) The grade in an elective course is based on a student’s performance in all of the competencies.
   a) A student must achieve satisfactory performance in every competency, as a minimal requirement, to receive a “Pass” for the elective. Unsatisfactory performance in any competency will result in a failing grade in the elective.
      i.) All electives must complete a final grade report form that includes the Final Report of Faculty Assessment of Student Performance in an Elective at the end of the elective. Additional information may be added to the final grade report.
      ii.) The form is stored by the Department and a copy is submitted to Student Affairs for recording the final grade on the student’s transcript and is included in the student’s file.
      iii.) Information on the form will be used in the Dean’s letter.

2) There are four possible grades that are recorded on the transcript: Honors, High Pass, Pass, or Fail, which are identified on the form described above.
   a) The grade will be a composite grade, using the standard form (mentioned above), and other evaluation tools that are approved by the Electives Subcommittees.
   b) An elective will determine its own formulas for determining the composite score. The formula must be documented and communicated to students in the orientation materials for the elective.

3) A failure in an elective course is recorded on a student’s transcript and its units do not accrue toward graduation requirements.
   a) If a student fails a elective that is required for graduation (e.g., Surgery Subspecialty or Subinternship) the student must pass a elective in the same subspecialty that fulfills the specific requirement. However, the remedial selective rotation may be taken at a different site from the original selective.
b) If a student fails an elective that accrues generally towards the total number of units needed for graduation, the student must complete and pass another elective to meet the required number of units.

Section Three: Timing & Completion of USMLE Examinations

A. NBME Comprehensive Exam

Approved: January, 2010

Policy Statement: Tucson students in Years 1 and/or 2 must take two formative assessments of their exam preparedness (commonly referred to as the “Mock USMLE exams”) in advance of the actual Step 1 examination. A student must take the exam at the time assigned to him/her by the College of Medicine. In the case of a student taking a leave of absence or some other extraordinary circumstances, the student must be excused in advance by the Associate Dean for Student Affairs. Students requiring rescheduling of exams may be charged a fee.

This policy on NBME comprehensive exams is in place for the benefit of students and for curricular evaluation purposes. Year 1 and/or Year 2 students will be required to take diagnostic exams constructed by the NBME. Exam results will not be recorded in official records or reflect on student progress, and students will not be asked to do any preparation for the tests other than what they are already engaged in for their current courses. By taking the exams, students will be given exposure to the USMLE testing methods, and their performance will provide them with some guidance as to their readiness for the Step exams. The exam items have been normalized against a national population, based on subsequent Step 1 and 2 results, thus students will be able to compare their performance against a reliable standard.

B. Timing of USMLE Examinations

Revision approved: August 3, 2016
Effective date: August 3, 2016 beginning with the Class of 2019

1) All students must take the USMLE Step 1 Exam within three years of the initial date of matriculation, excluding medical leaves of absence. Failure to do so will result in automatic dismissal from the College of Medicine.

2) All students who complete the Year 2 curriculum on time (without the need for remediation at the end of the academic year) must complete the USMLE Step 1 Exam for the first time prior to the first day of the Transition to Clerkship block.
   a) Extensions to take the exam after the first day of the Transition to Clerkship block are limited to students who need to remediate Year 2 coursework after the completion of the academic year and students on a leave of absence as approved by the Student Progress Committee (SPC) and the Associate Dean for Student Affairs.

3) Any student who postpones taking the USMLE Step 1 Exam without the approval of with the SPC and the Associate Dean of Student Affairs will be automatically dismissed from the College of Medicine.

4) All students must pass the USMLE Step 1 before taking the USMLE Step 2 Clinical Knowledge (CK) exam.

5) Enrollment in courses following initial attempt at USMLE Step 1:
   a. A student who has completed the Step 1 exam may begin his/her first clerkship rotation while his/her result is pending.
   b. In the case of a student in a dual-degree program, s/he must take the Step 1 exam before beginning any clerkship or starting any additional work toward the non-M.D. degree.
C. Non-Progression Following Failure of First Attempt at Step 1

Revision approved: November 2, 2016
Effective Date: November 2, 2016, effective with the Class of 2018

1) A student who does not achieve a passing score on the student’s first attempt at the USMLE Step 1 exam may not enroll in any medical school curricular course, including any course for any dual-degree program, until after the student has taken the Step 1 exam a second time. The sole exception is that the student may enroll in courses that are approved by the Office of Student Development (Tucson) and that serve to prepare for another attempt at Step 1.

2) If, while in clinical training, a student learns of a failure on the student’s first attempt at Step 1, the student must meet with Student Affairs and the Office of Student Development. The student may continue clinical training until the end of the block in which the student is enrolled (up to 2 rotation periods). Decisions on continuation of clinical activity will be tailored to the needs of the student, based on academic and non-academic factors. At the end of the clinical activity/clerkship in which the student is enrolled, the student may not advance to another clinical activity/clerkship until the student has retaken Step 1. If the student is enrolled in a course, the student may complete the course, but then must stop.

3) After completing a second attempt at USMLE Step 1, the student may enroll in a new clerkship rotation, as determined by Student Affairs and the Office of Student Development, while awaiting the student’s score on the second attempt. The student may not enroll in any course contributing to a dual-degree program, however, until a passing score has been posted.

4) If the student learns of a failure on the student’s second attempt at Step 1 while in clinical training, as with failure of the initial attempt, the student may continue clinical training until the end of the block in which the student is enrolled (up to 2 rotation periods). Decisions on continuation of clinical activity will be tailored to the need of the student, based on academic and non-academic factors. At the end of the clinical activity/clerkship in which the student is enrolled, the student may not continue in a subsequent clinical activity/clerkship rotation until a passing score has been posted.

5) The student is expected actively to engage in remedial efforts to improve the student’s performance on the USMLE Step 1. For example, the student may enroll in a Step 1-preparation course offered by the University or outside the University. If needed, the student will be enrolled in an independent study and will be supervised by the Office of Student Development. As part of the independent study, the student will be required to meet weekly and have his/her study supervised by the Office of Student Development or Office of Learning Resources.

D. Limitations on Multiple Attempts at USMLE Step 1 Exam

Approved date: April 20, 2011
Revision approved: June 1, 2016
Effective date: July 25, 2016 beginning with the Class of 2020

1) A student must obtain approval from the Student Progress Committee before scheduling a third or any additional attempts at the USMLE Step 1 exam.

2) The Student Progress Committee will consider the following criteria in deciding whether to approve a request:
   a) scores on the student’s previous attempts
   b) progress of scores on previous attempts
   c) recommendations of the staff of the Office of Student Development who have supervised the student
   d) the history of the student’s efforts to remediate, including what courses s/he has taken
e) for the Tucson track, the student’s participation in the PASS Step 1 course offered during Years 1 & 2
3) If an additional attempt is approved, the Student Progress Committee will review and approve the student’s study plan.
4) Every student must have passed the USMLE Step 1 exam within one calendar year (12 months) after the date of his/her first attempt. A student who has not passed one year after his/her first attempt will be automatically dismissed.
   a) The exact deadline for a calendar year will be postponed only until a pending score is posted for an exam that was taken before the one-year deadline. No further attempts after the one-year deadline will be allowed.
   b) If a student requires a medical leave of absence after the first unsuccessful attempt at the exam, the student may request that SPC extend the one-year deadline.
      i) No extension will be more than 6 months beyond the one-year deadline.

E. Timing of Step 2 Exams

1) It is recommended that a student take the USMLE Step II CK exam for a first time by November 30 of his/her senior year.
   a) In the case of a student taking a leave of absence that has been approved by the Student Progress Committee, s/he must take the Step II exam by another time determined by the Student Progress Committee.
   b) The student must pass the USMLE Step 1 exam before entering his/her last academic year (Year 4).
   c) If a student wishes to take the USMLE Step II CK exam after November 30, the student must obtain approval from the Student Progress Committee.
2) Students are strongly advised to take USMLE Step 2 CS no later than December 31 of their final academic year.
3) Every student must have passed the USMLE Step 2 CK exam within one calendar year (12 months) after the date of his/her first attempt. A student who has not passed one year after his/her first attempt will be automatically dismissed.
   a) The exact deadline for a calendar year will be postponed only until a pending score is posted for an exam that was taken before the one-year deadline. No further attempts after the one-year deadline will be allowed.
   b) The one-year clock will be stopped for a student who has an approved leave of absence. The clock will resume once the leave of absence is concluded.

Section Four: Dismissal from the College of Medicine

Approved date: August 3, 2016
Effective date: August 3, 2016

1) A student who meets any of the following conditions will be automatically dismissed from the Doctor of Medicine degree program. The Deputy Dean for Education will notify both the student and the Student Progress Committee of the criteria that triggered the automatic dismissal.
   a) The student fails the same course twice. This includes any course in the curriculum, including for example blocks, longitudinal, clerkships, electives, and intersession courses.
   b) The student fails three different courses. This includes any combination of failures of courses in the curriculum, including for example blocks, longitudinal, clerkships, electives, and intersession courses.
c) **The student fails to take the USMLE Step 1 Exam on time, stopping progress in the curriculum, without approval.**

d) **The student fails to timely pass the USMLE Step 1 Exam.** The student has not passed the USMLE Step 1 Exam within one calendar year (12 months) after the date of his/her first attempt.

e) **The student fails to timely pass the USMLE Step 2 Exam.** The student has not passed the USMLE Step 2 CK Exam within one calendar year (12 months) after the date of his/her first attempt.

f) **The student fails to academically progress within the required timeframes. (in effect with the class of 2019)** All students must satisfactorily complete Years 1 & 2 of the M.D. degree and take the USMLE Step 1 Exam within three years of the date of matriculation. A student will be deemed to have completed Year 2 upon an initial attempt at the USMLE Step 1 Exam. Year 3 academic progress may halt if a student fails the USMLE Step 1 Exam but will not toll the required graduation requirements six years from the original date of matriculation. All time limits are inclusive of leaves of absence, the repeat of an academic year, and retakes or remediation of any course, exam, or other requirement.  
   i. **Exceptions to section 1(e).** Dual-degree students in a College of Medicine MD-PhD or MD-MPH program may exceed the six year limit to satisfy the requirements for the M.D. degree stated in section 1(e) above. However, dual degree students must satisfactorily complete Years 1 & 2 of the M.D. degree and take the USMLE Step 1 Exam within three years of the date of matriculation and must satisfactorily complete all Year 3 & 4 Clerkship experiences and electives and pass USMLE Step 2 CK Exam within three years of beginning year 3.

g) **The student is not enrolled or on an approved leave of absence.** All students must be continuously enrolled in the M.D. or dual-degree program curriculum or on an approved leave of absence at all times. Failure to enroll or obtain a leave of absence for a period of three months will result in automatic dismissal.

---

1 The March 2016 revisions to section 1 (e) of this policy are effective with students matriculation in Fall 2016. All students that matriculated prior to Fall 2016 are held to the February 2012 policy, which required graduation within 6 years of matriculation, inclusive of dismissal.

2) A student who is automatically dismissed may reapply to the College of Medicine through the standard application process. If readmitted, the student will meet the Student Progress Committee to determine where the student should reintegrate into the curriculum.

3) A student who is subject to automatic dismissal is permitted to appeal to the Student Progress Committee.

Separation of Academic Assessment and Provision of Health Services to Students

This policy is included in its entirety below (including the opt-out option), however, it is subject to periodic updating and the most recent version will always be found online

Separation of Academic Assessment and
Provision of Health Services to Students
Approved by Student Affairs Committee
Approved by TEPC, December 5, 2012
Educational Policy Committee June 19, 2013

Policy Statement: Accreditation standard 12.5 requires that health professionals who provide services, including psychiatric/ psychological counseling, to a medical student have no involvement in the academic assessment or promotion of the medical student receiving those services.

In order to meet this standard the following policy will be implemented at the College of Medicine:

1) Health professionals who provide psychiatric/psychological counseling or other sensitive health services to University of Arizona medical students will not be involved in the academic assessment or promotion of the medical student receiving those services. Health professionals may give lectures in a large class setting but they may not facilitate small group discussions; serve as clinical preceptors, course/block/clerkship directors; or serve on the student progress or appeals committees.

2) Procedures by which this policy is implemented include:
   a) Health professionals from the University of Arizona Campus Health Service or the Arizona State University Healthcare who serve as instructional faculty in a block/course/clerkship in which the faculty member is expected to participate in academic assessment or promotion decisions for students may not provide health care to COM students. When a COM student requires urgent or emergency health services, the student should be referred to another physician who has no involvement in the academic assessment or promotion of the medical student unless either a delay in referral would cause harm to the student, or no other healthcare provider is available to provide such care.
   b) At the beginning of each block of small group sessions, each faculty member who serves as a facilitator in small group learning sessions will be asked to review the students assigned to his/her group and assure that he/she has not provided psychiatric/psychological counseling or other sensitive health services to any of these students. If a faculty facilitator has provided such services, the block/course/clerkship director will reassign the student or the faculty member to a different group.
   c) In the event that faculty with appointments at the College of Medicine practice at a facility where students seek health services or counseling, students will not be assigned to those providers to receive care.
   d) Students who determine that a faculty member from whom they have received psychiatric/psychological counseling or sensitive health services might be involved in assessment of their performance should notify the block/course/clerkship director or the Office of Student Affairs immediately; the director will reassign the student or the faculty member.
   e) When students who are participating in a preceptorship or a rural health professions placement located distant from Tucson require urgent or emergency health services, their preceptors will refer
the student to another member of the practice or another physician in the community or neighboring community who can competently care for the student and who has no involvement in the academic assessment or promotion of the medical students. The preceptor will retain the authority to countermand this provision if the student requires more immediate attention than would be possible through a referral for care.

f) If a health professional who has taught in the medical student curriculum receives a student performance assessment form to complete regarding a student to whom they have provided psychiatric/psychological counseling or sensitive health services, he/she will check the box at the top of the assessment form and return the blank form:

- **Pursuant to accreditation standards, I will not participate in assessment of this student’s performance.**

### New Innovations

New Innovations is an online medical education management system. The system is used by the clerkships to collect data on (1) faculty assessment of student performance, (2) student feedback on instruction, (3) student feedback on sites, and (4) student feedback on clerkships. Assessment data contributes to the determination of student grades and feedback provides information on the effectiveness of instruction, educational experiences at sites, and the clerkships as a whole. Systematic education program data collection and a coordinated evaluation of the curriculum that includes student feedback data on clerkships is required by the Licensing Committee on Medical Education (LCME) accreditation standards. New Innovations supports the collection and compilation of this data to not only meet educational goals but also accreditation standards.

Faculty and residents with whom students have worked will be requested to complete an online evaluation through New Innovations. Evaluations are created automatically using the matching function in this system. The Assessment of Student Performance survey can be completed by logging into New Innovations. Your Net ID serves as your user name and password. An email will be automatically sent by the system as a reminder when they open as well as periodically thereafter until completed.

Your Net ID serves as your user name and password. If you do not have a Net ID, a user name and password can be provided and used to access New Innovations using the following information:

- **Institution login:** UA (CAPS)
- **User name:** Assigned user name
- **Password:** An email will be sent to you with a random password. You will be prompted to change this the first time you log in.

Professionalism and Integrity

Attributes of Professional Behavior

These Attributes of Professional Behavior describe behaviors that medical students are expected to develop during the course of their education, both in the classroom and in the community in which the educational mission operates. This document serves to promulgate these attributes to faculty, residents, students, staff and community preceptors of the University of Arizona as explicit recognition of the shared responsibility for creating an appropriate environment for learning these attributes of professional behavior. The Attributes are consistent with existing University of Arizona and Arizona Board of Regents (ABOR) policies, as well as established policies implemented in undergraduate medical education, graduate medical education, residency programs, Arizona Health Sciences Center departments and clinical settings.

- Communicate in a manner that is effective and that promotes understanding, inclusion, and respect for individuals’ diverse characteristics.
- Adhere to ethical & legal principles as set forth in College of Medicine and University policies and other standards for scholarship, research, and patient care including advances in medicine.
- Demonstrate sensitivity and respect for others, irrespective of age, race or ethnicity, cultural background, gender, disability, social and economic status, sexual orientation, or other unique personal characteristics.
- Strive for excellence and quality of care in all activities and continuously seek to improve knowledge and skills through life-long learning while recognizing one’s own limitations.
- Uphold and be respectful of the privacy of others.
- Consistently display compassion, humility, integrity, and honesty as a role model to others.
- Work collaboratively to support the overall mission of the College and the University in a manner that demonstrates initiative, responsibility, dependability, and accountability.
- Maintain a professional appearance and demeanor and demonstrate respect for appropriate boundaries in all settings in which an individual is representing the College of Medicine or University.
- Promote wellbeing and self-care for patients, colleagues, and one’s self.
- Be responsive to the needs of the patients and society that supersedes self-interest.
The model below serves to link the various attributes ascribed to professionalism:

![Model](image)

The blocks at the base of the model above represent knowledge and skills that serve as foundations for developing professionalism.

**COMMUNICATION**: Communicate in a manner that is effective and promotes understanding, inclusion and respect for individuals’ diverse characteristics.

**ETHICAL & LEGAL UNDERSTANDING**: Adhere to ethical & legal principles as set forth in College of Medicine and University policies and other standards for scholarship, research and patient care including advances in medicine.

**HUMANISM & CULTURAL COMPETENCE**: Demonstrate sensitivity and respect for others, irrespective of their age, race or ethnicity, culture background, gender, disability, social and economic status, sexual orientation, and other unique personal characteristics.

**KNOWLEDGE**: Demonstrates understanding of basic sciences (biological and social sciences) and application to patient care, including skill in critical thinking and problem solving.

The pillars represent the behavioral application and practice of professionalism, which rely on the foundations underneath the pillars.

**EXCELLENCE**: Strive for excellence and quality of care in all activities and continuously seeking to improve knowledge and skills through life-long learning while recognizing one’s own limitations.

**ACCOUNTABILITY**: Work collaboratively to support the overall mission of the College and the University in a manner that demonstrates initiative, responsibility, dependability, and accountability. Maintain a professional appearance and demeanor, and demonstrate respect for appropriate boundaries in all settings in which an individual is representing the College of Medicine or University.

**RESPECT**: Uphold and be respectful of the privacy of others. Consistently display compassion, humility, integrity, and honesty as a role model to others.

**ALTRUISM**: Promote well-being and self-care for patients, colleagues, and one’s self. Be responsive to the needs of the patients and society that supersedes self-interest.
Professionalism For All at the College of Medicine

Professionalism is one of the core competencies for the community at the College of Medicine.

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online.

Policies

There are numerous policies that define and outline best practices of professionalism. The College of Medicine has established a comprehensive policy for the community, entitled “Policy Regarding Professionalism and Reporting Misconduct for Faculty and Learners at the University of Arizona, College of Medicine”.

The comprehensive document provides information regarding the definition of professionalism and related policies. The first section includes the University of Arizona policies that apply for all faculty, learners, staff, as well as policies that apply only for medical students. The second section provides a means for reporting exemplary professional behavior or violations of professionalism. This is followed by policies for definitions of the violations and for reporting procedures.

| Policy Regarding Professionalism and Reporting Misconduct for Faculty and Learners at the University of Arizona College of Medicine |
|---|---|
| **SECTION 1** | **SECTION 2** |
| Policies for all faculty, learners, staff | Policies related exclusively to medical students | Professionalism Report and policies for reporting what and to whom |
| **Attributes of Professional Behavior** | **Student Progress & Appeals** | **Submit Report** |
| • Conflict of Interest | • Program Objectives | • Nondiscrimination and Antiharassment Policies |
| • Student Code of Conduct | • Code of Conduct & Procedures for Honor Code Committee | • Definitions |
| • Nondiscrimination and Anti-Harassment | • Code of Academic Integrity | • Professional Misconduct Prohibited |
| • Workplace Violence | | • Policies for Reporting Misconduct |
| • Disruptive Behavior in Institutional Setting | | • Confidentiality |
| • Disruptive and Threatening Student Guidelines | | • Remedies |
| • Protection of Employees from Reprisal for Whistle Blowing | | • Records Retention |
Community for the Practice and Teaching of Professionalism

Professionalism is taught and practiced in the College of Medicine community. The table below describes in general terms: (1) the formats for which teaching professionalism to medical students occurs in the community, (2) the ways in which student performance of professionalism is assessed, and (3) the ways in which the teaching of professionalism is evaluated. Not included in the table are the ways in which the community (hospitals, university departments) train and evaluate professionalism of its faculty and staff.

1. Description of the formats in which professionalism is taught to medical students in the College of Medicine community

Mistreatment

Professionalism Program Mistreatment Definitions and Reporting for Medical Students

Goal
The University of Arizona College of Medicine-Tucson Professionalism Program and the College’s administrators are dedicated to improving and advancing our learning environment and to reducing/eliminating behaviors toward our learners not conducive to their growth and professional development.

This policy is in addition to the University of Arizona’s Non-discrimination and Anti-harassment policy, which prohibits discrimination, including harassment and retaliation, based on a protected classification, including race, color, religion, sex, national origin, age, disability, veteran status, sexual orientation, gender identity or genetic information. Any suspected violation of this policy will be referred to the Office of Institutional Equity.
Definition of Mistreatment
The Association of American Medical Colleges (AAMC) Graduation Questionnaire defines mistreatment as follows:

“Mistreatment either intentional or unintentional occurs when behavior shows disrespect for the dignity of others and unreasonably interferes with the learning process. Examples of mistreatment include sexual harassment; discrimination or harassment based on race, religion, ethnicity, gender or sexual orientation; humiliation; psychological or physical punishment; and the use of grading and other forms of assessment in a punitive manner.”

Categories of Mistreatment

Physical Mistreatment:
- “Physically mistreated causing pain or potential injury”
- “Pushed/slapped hand”
- “Exposed to other forms of physical mistreatment used to express frustration, make a point, or get attention”

Verbal Mistreatment:
- “Threatened/intimidated”
- “Yelled at”
- “Degraded/ridiculed/humiliated/insulted/sworn at/scolded/berated”
- “Exposed to inappropriate conversation/comments”

Sexual Harassment:
- “Exposed to hostile environment, including inappropriate physical contact, gender discrimination, sexual jokes, inappropriate comments, innuendo, and inappropriate requests of a sexual nature”
- “Unwanted social invitations (quid pro quo)”
- “Ignored because of gender”

Ethnic Mistreatment:
- “Exposed to racial or religious slurs/jokes”
- “Stereotyped”
- “Neglected/ignored (because of ethnicity)”

Power Mistreatment:
- “Dehumanized/demeaned/humiliated”
- “Deliberately asked a question the physician knows the student cannot answer (malignant pimping)”
- “Intimidated/threatened with poor evaluation or grade consequences”
- “Asked to do inappropriate tasks”
- “Forced to adhere to inappropriate scheduling”
- “Neglect/ignored”

Adapted from The Pritzker School of Medicine, University of Chicago’s examples of mistreatment and non-mistreatment:
| M | Malicious intent | On the first day of third year, the ward clerk says to the student, “you guys are green,” then offers to help the students find a computer station. | A resident purposely gives a student misinformation before rounds. The student overhears the resident laughing about messing him over. |
| I | Intimidation on Purpose | A student working with the chairman of surgery says he feels nervous about operating with him since the chairman can “make or break” his career. | A resident tells a student that he intends to make her cry before the rotation is over. |
| S | Sexual harassment | A male student is asked not to go into a room because a female patient only wants a female to examine her. | A male attending tells a female student, “I can tell you know how to grab it like you mean it” while she is inserting an indwelling Foley catheter. |
| T | Threatening verbal or physical behavior | A student is yelled at to “get the XXX out of the way” by a nurse as a patient is about to be shocked during a code. | An attending grabs the student’s finger with a clamp in the OR or tells the student he is an idiot after he could not answer a “pimp” question. |
| R | Racism or excessive discrimination | An attending gives a student feedback on how to improve performance. | A resident tells a Hispanic student his “people” (assuming illegal immigrants) are responsible for high healthcare costs. |
| E | Excessive or unrealistic expectations | A student is asked to review an article and present it on rounds to the team. | A resident tells a student it is her job to perform rectal exams (necessary or not) on all the patients admitted to the service. |
| A | Abusive favors | A student is asked to get coffee for herself and for the team prior to rounds. The resident did it yesterday. The team gives the student money. | A student is asked to pick up an attending’s dry cleaning. |
| T | Trading for grades | A resident tells a student she can review and present a topic to the team as an opportunity to enhance her grade. | A student is told that if he helps a resident move, he will get honors. |

As the above table illustrates, there is a distinction between *embarrassment*, which is NOT mistreatment, and *harassment*, which is mistreatment.

- Embarrassment: The state of feeling foolish in front of others. Example: An attending tells a student to prepare for an upcoming surgery by reviewing the relevant anatomy. The student fails to do so and is embarrassed when the attending asks an anatomical question during the surgery and is unable to provide the answer.
- Harassment: When an unpleasant or hostile situation is purposefully created. Example: An attending physician purposely asks a question s/he feels the student will not know the answer to and then publically calls her/him “stupid.”
Reporting Concerns of Possible Mistreatment

a. Medical students who are the subject of mistreatment or who have witnessed mistreatment of their fellow student are encouraged to discuss it with a faculty member/staff who is in a position to understand the context and address necessary action. Retaliation against medical students who report is not tolerated.

b. The following positions should be considered as primary resources:
   - Block/Course Directors
   - Deans in the College of Medicine
   - Professionalism Support Team
   - Ombudsman
   - Students on away rotations should report to their course director at the site or to the above College of Medicine resources.
   - If the student does not feel comfortable reporting the mistreatment in person he/she can file a confidential report via the professional conduct comment form.

Any report suggesting mistreatment will be referred to the University’s Professionalism Committee. Any report suggesting unlawful discrimination or harassment under the University’s Non-discrimination and Anti-harassment policy will be referred to the Office of Institutional Equity. Students may also directly report suspected discrimination or harassment to the Office of Institutional Equity.

Anyone found to have engaged in mistreatment will be subject to disciplinary action.

References

Professional Conduct Comment Form

The Professional Conduct Comment Form provides a process for faculty, residents, fellows, medical students, and staff to comment upon either exemplary professional behavior OR lapses in professional behavior demonstrated by faculty, residents, fellows, medical students, or staff in the learning environment at the University of Arizona College of Medicine, to the Professionalism Program, through the mechanism outlined below.

The purpose of the Professionalism Program, which is composed of key administrators and faculty and staff representation, is to promote and reward excellence in professional behavior and ensure both compliance with policies and procedures addressing professional conduct, as well as to address inappropriate conduct.
The comment form is a mechanism created to allow follow-up on a concern of a lack of or a departure from professionalism standards, or to commend an individual for exemplary professional behavior. Submitting a comment about a lack of professionalism will start a process to address a concern, which may or may not result in disciplinary action against the individual about whom the comment was submitted.

Any constituent will be able to access the comment form via the UA COM Internet site and submit a report (using Net ID). While not completely anonymous, the COM will strive to maintain the privacy of the individual who submitted the comment to reduce the “chilling” effect that making public comments would create. However, in the interest of fairness to the individuals charged with unprofessional conduct as well as other persons who may be asked to provide additional information, neither confidentiality nor anonymity can be guaranteed. Retaliation of any kind against individuals providing comments or others whose information may be required to substantiate a charge is prohibited and will be treated as a violation of the Student Code of Conduct or of other applicable University and ABOR policies.

After receiving a comment, the Professionalism Program will distribute it to the appropriate administrators for acknowledgement or action as deemed necessary.

**Cup of Coffee Conversations to Promote Professionalism Initiative**

On July 1, 2017 the University of Arizona College of Medicine – Tucson implemented the Cup of Coffee Conversations to Promote Professionalism* pilot program. The Professionalism Support Team in collaboration with the Professionalism Program modeled this initiative after the process developed by Vanderbilt University. The purpose of the Cup of Coffee Conversation is to take a proactive, non-punitive approach to lapses in professionalism.

Trained messengers include faculty, fellows, residents, staff, and medical students, who deliver a single story/observation of a reported unprofessional behavior with no judgment or intervention. This is done with the sole purpose of raising awareness.

* Promoting Professionalism: Addressing Behaviors that Undermine a Culture of Safety, Reliability, and Accountability © Center for Patient and Professional Advocacy, Vanderbilt University Medical Center, 2016

**Policy on Interactions with Industry/Conflict of Interest (COM)**

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online.
Purpose of Policy

The purpose of this policy is to establish guidelines for interactions with industry representatives for medical staff, faculty, staff, students, and trainees of The University of Arizona College of Medicine. Interactions with industry occur in a variety of contexts, including marketing of new pharmaceutical products, medical devices, and research equipment and supplies; training for newly purchased devices; the development of new devices; educational support of medical students and trainees; and continuing medical education. Faculty and trainees also participate in interactions with industry off campus and in scholarly publications. Many aspects of these interactions are positive and important for promoting the educational, clinical and research missions of the College of Medicine. However, these interactions must be ethical and cannot create conflicts of interest that could endanger patient safety, data integrity, the integrity of our education and training programs, or the reputation of either the College of Medicine or its personnel.

Definitions

Conflict of interest: That situation which exists when a faculty, staff, student or trainee of The University of Arizona College of Medicine may have a significant financial or other personal consideration that may compromise, or have the appearance of compromising, their professional judgment or integrity in clinical responsibilities, teaching, conducting or reporting research, or performing other College obligations.

Commercial interests (Industry): any proprietary entity producing health care goods or services, with the exception of non-profit or government organizations and non-health care related companies.

Statement of Policy

It is the policy of The University of Arizona College of Medicine that interactions with industry should be conducted so as to avoid or minimize conflicts of interest. When conflicts of interest do arise they must be addressed appropriately, as described herein.

Scope of Policy

This policy incorporates the following types of interactions with industry:

I. Gifts and compensation

II. Site access by sales and marketing representatives

III. Provision of scholarships and other educational funds to students and trainees

IV. Support for educational and other professional activities

V. Disclosure of relationships with industry

VI. Oversight of Conflict of Interest Policy

VII. Training of students, trainees, and staff regarding potential conflict of interest in industry interactions
I. Gifts and Compensation

A. Personal gifts from industry may not be accepted anywhere at The University of Arizona College of Medicine or clinical facility operated by the College. In addition, University of Arizona College of Medicine faculty, staff and trainees may also not accept gifts at any non-College-operated clinical facility such as other hospitals, outreach clinics and the like. Non-faculty medical staff are strongly discouraged from accepting gifts at non-College-operated clinical facilities but are not proscribed by this policy from doing so.

1. It is strongly advised that no form of personal gift from industry be accepted under any circumstances. Individuals should be aware of other policies, such as the AMA Statement on Gifts to Physicians from Industry (http://www.ama-assn.org/ama/pub/category/4001.html) and the Accrediting Council for Continuing Medical Education Standards for Commercial Support (www.accme.org), which apply by reference to faculty, staff and trainees under this Policy.

2. Individuals may not accept gifts or compensation for listening to a sales talk by an industry representative.

3. Individuals may not accept gifts or compensation for prescribing or changing a patient’s prescription.

4. Individuals may accept product samples from commercial interests only for patient use.

B. Individuals must consciously and actively divorce clinical care decisions from any perceived or actual benefits expected from any commercial interest. It is unacceptable for patient care decisions to be influenced by the possibility of personal financial gain.

C. Individuals may not accept compensation, including the defraying of costs, for simply attending a CME or other activity or conference (that is, if the individual is not speaking or otherwise actively participating or presenting at the event).

D. Faculty, staff, students and trainees are discouraged from participating in Speaker’s Bureaus. Financial compensation to faculty from Biomedical Companies such as Consulting Fees or Speaker’s Bureaus compensation must be approved by the Department and reported to the College of Medicine.

II. Site Access by Sales and Marketing Representatives

A. Sales and marketing representatives are permitted in non-patient care areas by appointment only. Appointments will normally be made for such purposes as:

1. In-service training of College personnel for research or clinical equipment or devices already purchased.

2. Evaluation of new purchases of equipment, devices, or related items.

B. Appointments may be made on a per visit basis or as a standing appointment for a specified period of time, at the discretion of the faculty member, his or her division or department, or designated hospital personnel issuing the invitation and with the approval of appropriate hospital management.
III. **Provision of Scholarships and Other Educational Funds to Students and Trainees**

A. Industry support of students and trainees should be free of any actual or perceived conflict of interest, must be specifically for the purpose of education and must comply with all of the following provisions:

1. The College of Medicine department, program or division selects the student or trainee.
2. The funds are provided to the department, program, or division and not directly to the student or trainee.
3. The department, program or division has determined that the funded conference or program has educational merit.
4. The recipient is not subject to any implicit or explicit expectation of providing something in return for the support, i.e., a “quid pro quo.”

IV. **Support for Educational and Other Professional Activities**

A. ACCME Standards for Commercial Support bind all such activities at the College of Medicine. They provide guidelines for evaluating all forms of industry interaction, both on and off campus and including both University of Arizona College of Medicine events, as well as other events. The Standards are found at www.accme.org.

B. All educational events offered by The University of Arizona College of Medicine must be compliant with ACCME Standards for Commercial Support whether or not CME credit is awarded.

1. Educational grants that are compliant with the ACCME Standards may be received from industry but must be placed in a general designated account, and administered by departments or divisions and not by individual faculty.
2. Divisions and departments must maintain records of compliance with the ACCME Standards.

C. Meals or other types of food or drink directly funded by industry may not be provided at University of Arizona College of Medicine activities or at associated clinics.

D. Faculty and medical staff should evaluate very carefully their own participation in meetings and conferences that are fully or partially supported or run by industry because of the high potential for perceived or real conflict of interest.

E. This provision does not apply to faculty attending meetings of professional societies that may receive partial industry support, meetings governed by ACCME Standards, and the like.

F. Individuals who actively participate in meetings and conferences supported in part or in whole by industry (e.g., by giving a lecture, organizing the meeting) should follow these guidelines:

1. Financial support by industry is fully disclosed prior to the activity and at the beginning of the presentation by the meeting supporter.
2. The meeting or lecture content is determined by the speaker and not the commercial supporter.
3. The lecturer is expected to provide an impartial and objective assessment of therapeutic options and to promote objective scientific and educational activities and discourse.
4. The College participant is not required by the commercial supporter to accept advice or services concerning speakers, content, etc., as a condition of the commercial supporter’s contribution of funds or services.
5. The lecturer makes clear that content reflects individual views and not the views of University of Arizona College of Medicine.
6. The use of The University of Arizona College of Medicine name in a commercially supported event is limited to the identification of the individual by his or her title and affiliation.

V. Disclosure of Relationships with Industry

A. Individuals are prohibited from publishing articles under their own names that are written in whole or material part by industry employees.

B. In scholarly publications, individuals must disclose their related financial interests in accordance with the International Committee of Medical Journal Editors (http://www.icmje.org).

C. Faculty with supervisory responsibilities for students, residents, trainees or staff should ensure that the faculty’s conflict or potential conflict of interest does not affect or appear to affect his or her supervision of the student, resident, trainee, or staff member.

D. Individuals having a direct role making institutional decisions regarding equipment or drug procurement must disclose to the purchasing unit, prior to making any such decision, any financial interest they or their immediate family have in companies that might substantially benefit from the decision. Such financial interests could include equity ownership, compensated positions on advisory boards, a paid consultancy, or other forms of compensated relationship. They must also disclose any research or educational interest that might substantially benefit either the Department or the individual by making the decision. The purchasing unit will decide whether the individual must recuse him/herself from the purchasing decision.

1. This provision excludes indirect ownership such as stock held through mutual funds.
2. The term “immediate family” includes the individual’s spouse or domestic partner or dependent children.

E. For disclosure requirements related to educational activities, see the ACCME Standards for Commercial Support (www.accme.org).

F. Faculty, staff and trainees who are engaged in teaching, research, administration or business operations in the College of Medicine also must comply with the University’s Individual Conflict of Interest and Conflict of Commitment Policy. (See http://orcr.vpr.arizona.edu/COI-policy.) In addition
to the annual reports required under that policy, faculty, staff and trainees must annually report all grants, contracts, speaker’s bureaus, consulting arrangements, gifts, or financial interests they may have with biomedical companies.

**VI. Oversight of Conflict of Interest Policy**

A. Faculty and staff will complete disclosure reports during their annual evaluations. Department Heads are responsible for assuring that all faculty complete a yearly Conflict of Interest form. Failure to complete a disclosure form may result in adverse action by the Department and Dean’s office.

B. Disclosure reports will be kept on file in the Faculty Affairs Office and will be made available to students and trainees.

C. Students, trainees, staff and faculty are encouraged to report any violation of this Conflict of Interest Policy or concerns about educational conflicts to the Dean’s office. Any concern about a possible Conflict of Interest Policy violation will be investigated by the Dean’s Office. Corrective action will be taken when necessary to assure compliance with the Policy.

**VII. Training of Students, Trainees, and Staff Regarding Potential Conflict of Interest in Interactions with Industry.**

All students, residents, trainees, and staff shall receive training regarding potential conflicts of interest in interactions with industry. Conflict of Interest education will be part of the New Faculty Orientation. Faculty will receive yearly reminders with a link to the Conflict of Interest Policy. Education of the College of Medicine trainees will be coordinated through the GME Office; education for medical students will be coordinated through the Office of Medical Education.

### Society Mentors – Policy on Conflict of Interest

*(Effective 12/12/2013)*

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online *(Grading and Progression Policy)*.

Rationale: Societies Program mentors have a unique role at the College of Medicine (COM) in which they maintain multiple responsibilities for their students including education, career advising and mentoring. Societies Program mentors are among the COM’s best clinical educators and frequently serve in other leadership roles in the curriculum or administration of the COM. The purpose of this policy is to clarify the COM’s position when there may be a perceived or real conflict of interest between a mentee and his/her mentor’s other educational roles.

1) Societies Program mentors may not grade their own students in the Doctor and Patient course, which is administered by Societies Program mentors. Rather, the grade in this course is determined by the student’s score on the year 2 Clinical Thinking OSCE, which is observed and graded by a Societies Program mentor different from the student’s designated mentor (this policy has been in place since the Societies Program was initiated in 2006).
2) Effective immediately, the Societies Program mentors who currently serves as a block director may tabulate and report grades based on students’ performance in Case-based Instruction (CBI), Team-based Learning (TL) and exams but may not independently assess individual students. A block director who is also a Societies Program mentor may not function as a regular CBI facilitator for his or her assigned mentees, because serving as a CBI facilitator requires assessment of the performance of students in their CBI group. Additionally, if a mentee challenges the overall block grade, the matter will be referred to a co-Block Director and/or the Associate Dean for Medical Student Education rather than the block director who is the mentee’s designated mentor.

3) Effective fall 2013, new Societies Program mentors may not serve as block directors.

4) Effective immediately, a Societies Program mentor may not function as a regular CBI facilitator for his/her assigned mentees.

5) Effective immediately, current clerkship directors who are Societies mentors (of which there currently are two) may continue in both roles, because clerkship directors may collect, tabulate and report composite grades based on clinical performance and the clerkship final exam but may not independently assess individual students. The clerkship director or another faculty member heavily involved in the clerkship will compile the summary narrative and final grade for those students who are the mentees assigned to the clerkship director. Additionally, if a clerkship director’s mentee challenges an overall clerkship grade, the matter will be referred to a clerkship director and/or the Associate Dean for Medical Student Education rather than the clerkship director.

6) Effective fall 2013, new Societies Program mentors may not serve as clerkship directors.

7) Effectively immediately, a Societies Program mentor may not officially provide a performance assessment of his or her assigned mentees within the clerkships.

8) A Societies Program mentor may be a member of COM administration (exception as below). However, if an administrative issue that falls under his/her area of responsibility arises with one of his/her mentees, the matter will be referred to the administrator’s direct supervisor.

9) A Societies Program mentor may not be employed in the Office of Student Affairs.

10) A Societies Program mentor may not be the director of a graduate medical education (GME) program.

11) Until the end of academic year 2013-2014 if a Societies Program mentor is a member of the Student Progress Committee (SPC), he/she must continue to recuse him/herself from the proceedings in the event that one of his/her mentees appears before the SPC.

12) Effective July 1st 2014, Societies Program mentors may not serve on the SPC.

13) Societies Program mentors, as their students’ primary advisor, have access to his/her mentee’s grades for the sole purpose of facilitating academic support when needed; Societies Program mentors will have access to the grades of only their assigned mentees and to no other students. Access to the mentees’ grades is granted by the Office of Student Records only after mandatory Family Educational Rights and Privacy Act (FERPA) training is completed by the Societies Program mentor and verified by Office of Clinical and Professional Skills.
Risk Management

Supervision of Medical Students in Clinical Learning Situations

The University of Arizona COM recognizes the importance of graded and progressive responsibility in medical student education. The supervision policy as it pertains to students in the clinical learning situations outlines the requirements to be followed when supervising medical students in an effort to promote safe patient care and maximize the development of the students’ knowledge and skills. Our medical students must be directly supervised at all times when in the clinical environment. The two types of supervision are: (1) direct supervision with the supervising physician present and (2) direct supervision with the supervising physician available.

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be found online.

Approved: October 17, 2012

The University of Arizona College of Medicine campus recognizes and supports the importance of graded and progressive responsibility in medical student education. This policy outlines the requirements to be followed when supervising medical students. The college’s goal is to promote safe patient care and maximize students’ development of skills, knowledge, and attitudes needed to enter the practice of medicine.

Relevant LCME Standard

9.3. A medical school ensures that medical students in clinical learning situations involving patient care are appropriately supervised at all times in order to ensure patient and student safety, that the level of responsibility delegated to the student is appropriate to the student’s level of training, and that the activities supervised are within the scope of practice of the supervising health professional.

Distribution

This policy is distributed to all faculty within the University of Arizona College of Medicine including clerkship directors, residency program directors, fellowship directors, and community/rural faculty preceptors.

Supervising Physician Definition

An attending physician employed by the College of Medicine; a community/rural attending physician with an associate faculty appointment at the College of Medicine; a resident or fellow physician training in a graduate medical education program at or associated with the College of Medicine.

Responsibility

It is the responsibility of the supervising faculty member and/or site director to assure that the specifications of this policy are followed for all medical students of the University of Arizona College of Medicine.
**Allied Healthcare Providers**

When a medical student is participating in a private practice setting in which allied healthcare providers are present, it is the responsibility of the supervising faculty physician to assure that the allied healthcare providers are appropriately credentialed and capable of medical student supervision within the scope of their practice.

When a medical student is participating in a hospital-based practice, it is assumed that all allied healthcare providers employed are appropriately credentialed by the hospital and capable of medical student supervision within the scope of their practice.

**Supervision Levels**

- **Direct Supervision With Supervising Physician Present**: The supervising physician is physically present with the medical student and the patient and is prepared to take over the provision of patient care if/as needed.

- **Direct Supervision With Supervising Physician Available**: The supervising physician is on-duty and is available to provide direct supervision.

**Clinical Supervision**

- In the clinical setting (in-patient or out-patient), MS 1 and 2 students will be *directly supervised with the supervising physician present or with the supervising physician available* and MS 3 and MS 4 students will be *directly supervised with supervising physician available*.
- Faculty physicians will identify those patients for whom initial medical student supervision may be provided by fellows, residents, and/or appropriately credentialed allied healthcare providers.
- Medical Students, in the course of their educational curriculum, may take patient histories and perform complete physical examinations.
- Year 3 and year 4 medical students may enter findings in the medical record of the patient with the approval of the patient’s supervising physician.
- The supervising physician will review medical student documentation and provide feedback for educational purposes.
- Clinical decisions and orders are never formulated or enacted by medical students without a supervising physician’s input.
- All on-call experiences in which medical students participate are subject to the supervision rules described above.

**Procedure Supervision**

- Medical students may be assigned and directed to provide additional patient care services under the direct supervision of a supervising physician.
- A supervising physician is required to directly supervise (physician present or available) all procedures (clinical, in-patient bedside, emergency department, and/or operating room) in which a medical student is involved.
- The degree of supervision (direct supervision with supervision physician present or available) will take into account the complexity of the procedure, potential for adverse effects, and the demonstrated competence, maturity and responsibility of each student in order to ensure the safety and comfort of the patient.
• The supervising physician must have privileges or authorization to perform the procedure being supervised.

**Student Health**

**Student Health and Safety**

The safety and security of our students is of utmost importance. Please orient and review all relevant safety, emergency contact information, hospital codes, evacuation plans, security policies and procedures with any students assigned to your location. Emergency contact information for the student and for the facility that they are attending should be distributed to each party and maintained in a previously identified location.

**Urgent/Emergent Health Care Services**

Preceptors should relay the following information to any student on site.

"When students who are participating in a preceptorship or a rural health professions placement located distant from Tucson requires urgent or emergency health services, their preceptors will refer the student to another member of the practice or another physician in the community or neighboring community who can competently care for the student and who has no involvement in the academic assessment or promotion of the medical students. The preceptor will retain the authority to countermand this provision if the student requires more immediate attention than would be possible through a referral for care." He/she will assure that the medical student is directed to services in a timely manner.

In the event of any emergency related to the student from the University of Arizona College of Medicine, the Office of Student Affairs should also be contacted at the appropriate campus:

**Tucson**
Office of Student Affairs
Dr. George Fantry, Senior Associate Dean of Student Affairs
Contact number is (520) 626-6216.

**Student Safety**

See the links to University of Arizona Fire Alarm Policy for Building Occupants, AHSC – Sarver Heart Center and student areas, and emergency contact information for College of Medicine personnel.

**Student Occupational Exposure Policy**

The medical student occupational exposure to potentially infectious agents and/or hazardous materials policy and procedures were developed in an effort to facilitate immediate evaluation and treatment in the event of any medical student exposure whether it is at a hospital setting or a rural setting.

This policy is included in its entirety below, however, it is subject to periodic updating and the most recent version will always be online.
Arizona Health Sciences Center Student Occupational Exposure to Potentially Infectious Agents and/or Hazardous Materials Policy and Procedures

It is the policy of The University of Arizona Health Sciences Center (AHSC) that all students who are exposed (i.e. needle stick, inhalation, mucus membrane or skin exposure or percutaneously to infectious agents and/or hazardous materials including blood/body fluids) while engaged in a University-sponsored educational program seek and obtain prompt medical attention, including counseling, prophylactic drug treatment, and baseline and follow up laboratory values, as necessary.

PURPOSE
The purpose of this document is to establish policy and procedures for student occupational exposure to potentially infectious agents and/or hazardous materials.

DEFINITIONS
Students: University of Arizona students who are currently enrolled in one of the AHSC colleges or a non U of A student on an approved clinical rotation as a visiting student with an AHSC college.

Occupational exposure to potentially infectious agents and hazardous materials: An exposure by skin, eye, mucous membrane, or parenteral contact with blood or other potentially infectious materials that may result from the performance of duties or exposure by inhalation, skin, eye, or mucous membrane to substances defined as hazardous chemicals present in the training site.

STUDENT OCCUPATIONAL EXPOSURE PROCEDURE CARDS (Card)
Student Occupational Exposure Procedure Cards (hereafter referred to as “Card”) are developed for and distributed to AHSC students by their respective college’s Office of Student Affairs. Cards are also available at AHSC Student Affairs offices and posted online to all AHSC Student Affairs websites. Students must keep this Card readily available. Students must refer to and present the Card to the health care provider in the event of an exposure during training. AHSC periodically revises student occupational exposure policies and procedures and will distribute updated Cards as applicable.

Because students utilize many facilities for their training, it is important to note the Cards are intended to be general instructions on how to proceed in the event of an exposure. The Cards DO NOT take the place of IMMEDIATE evaluation and treatment.

PREVENTION EDUCATION FOR STUDENTS
In addition to education built into each college’s curriculum, students must complete required chemicalsafety and bloodborne pathogens training as outlined by The Department of Risk Management Services (RMS). This training is required by Occupational Safety and Health Administration (OSHA) standards and includes information on hazard recognition, exposure prevention, and post-exposure procedures.

FINANCIAL RESPONSIBILITY:
After the student’s insurance has paid the claim, the college will reimburse the student for the amount he/she paid for the initial assessment, prophylactic treatment, and necessary tests including labs related to the exposure. See Reimbursement Procedure.

Visiting students are not eligible for reimbursement.
The student maintains financial responsibility for medical costs beyond the care outlined above.

Students are not eligible for worker’s compensation benefits.

**TRAINING INSTITUTIONS AND SITE AFFILIATES**
All contracts with training institutions and site affiliates will include a provision that requires the training institutions and site affiliates to provide or make available assessment of an exposure to determine exposure significance and the necessity for treatment, if applicable. Provision will also require the training institution and site affiliate to ensure any required assessment and treatment will be within the time limits articulated, as set forth in the most recent protocols of the Centers for Disease Control (CDC) and consistent with the Occupational Safety and Health Administration (OSHA) Standards.

**STUDENT OCCUPATIONAL EXPOSURE PROCEDURE (Card Contents)**
In the event of an exposure, students must follow the following procedure.

1. Remove soiled clothing and wash the exposed area with soap and water, if appropriate. Administer first aid as appropriate to the exposure*

2. Immediately notify attending physician/supervisor of exposure

3. Students shall present at the Affiliate’s Employee Health, ER, or Urgent Care for assessment and initial prophylactic treatment if applicable

4. Students should present the Card to treating health care provider

5. For Blood/Body Fluid Exposures: Following the incident, the Affiliate shall immediately make available to the affected student a copy of all the student’s records relating to the treatment and follow up, and if and when available, results regarding the HIV, HBV, and HCV status of the source, to the extent permitted by law

6. Following the incident, the student must download and complete the Non-Employee Incident Report Form from the UA Risk Management website and send to BOTH of the departments listed below. FORM: [http://risk.arizona.edu/forms/index.shtml](http://risk.arizona.edu/forms/index.shtml)

<table>

</tr>
</tbody>
</table>
7. Within 5 days of the exposure, the student must follow up with Campus Health
   TUCSON: University of Arizona Campus Health 520-621-6493
   PHOENIX: ASU Downtown Campus Health 602-496-0721

   **FOR TREATING PHYSICIAN:** If consultation is needed, treating physician may contact the on-call
   infectious disease physicians at UA via the Physician’s Resource Line at 520-694-5868 or 800-777-7552 to discuss recommendations for tests and/or medications related to the student’s exposure.

   Arizona Poison and Drug Information Center (24/7): 1-800-222-1222

   Post-exposure testing and further prophylactic drug treatment of AHSC students will be performed in Tucson or Phoenix.

   **REIMBURSEMENT PROCEDURE**
   For UA AHSC Students Only
   Colleges cannot process a payment to a health care facility on a student’s behalf. Therefore, all claims will be processed as reimbursements.

   In order to receive reimbursement, the student must first bill his/her health insurance. Then, the student must pay the remaining balance and submit the following documents to the student’s respective college’s Office of Student Affairs in order to have the claim reimbursed.

   In order to have the claim reimbursed, the student must submit:
   1. Student Occupational Exposure Reimbursement Claim Form
   2. An itemized bill
   3. Explanation of Benefits (EOB) from insurance company
   4. Paid receipt

Clerkship Site Director Job Description
2021-2022

Thank you for your commitment and dedication to teaching our University of Arizona College of Medicine medical students. We truly appreciate the time and effort that you devote to being a clerkship site director.

Single Site Directors

- Provide administrative oversight of all of the University of Arizona College of Medicine students at your clerkship site
- Adhere to UA COM affiliation agreements, policies, and procedures (as outlined in the General Faculty Manual and the Clerkship Specific Student Manual)
- Review and sign a UA COM Site Director job description for each academic year which will be kept on file within Curricular Affairs (Tucson campus).
- Participate in the semi-annual clerkship director and site director meetings
- Participate in your annual clerkship physical site visit by the clerkship director or a designated UA COM faculty member
- Assure the timely completion of student evaluations (to include mid-clerkship feedback) at your clerkship site
- Familiarize medical students at your site to pertinent safety measures
- Orient medical students to your clerkship specific site
- Problem-solve any concerns or issues medical students may have regarding the clerkship specific site

Site Directors with Multiple Preceptors (above plus the below)

- Assist in obtaining UA COM faculty titles for all faculty that teach at your site
- Inform all faculty at your clerkship site of their responsibility to be oriented and adhere to UA COM affiliation agreements, policies, and procedures (as outlined in the General Clerkship Instructor Manual and the Clerkship Specific Student Manual)
- Help to identify other faculty to teach at your clerkship site
- Serve as a liaison between the UA COM clerkship director and the other faculty at your clerkship site to communicate information regarding the educational program and policies
- Provide oversight of the teaching faculty within your clerkship site including the provision of appropriate supervision of medical student learning
☐ I have read and understand the responsibilities of my role as clerkship site director for the University of Arizona College of Medicine.

University of Arizona College of Medicine
Teacher-Learner Compact

Approved by the Educational Policy Committee 10/17/2012

I have read and agree to adhere to the principles outlined in the Teacher Learner Compact.

________________________________ ________________________________ _________________
Print Name    Signature    Date

Preamble

Faculty, whether employed by the University of Arizona College of Medicine or affiliated through agreements with the University as community faculty, and medical students (who for purposes of this policy also include residents and fellows and hereafter are referred to as “learners”) are obligated under a variety of policies and standards, both at the College of Medicine (COM) and within the University of Arizona, to interact with one another in a professional manner. The COM is committed to ensuring that the learning environment is conducive to open communication and robust interactions between faculty and learners that promote the acquisition of knowledge and foster attitudes and skills required for the professional practice of medicine. Such activities require an environment that is free from harassment, discrimination, retaliation, or other inappropriate conduct. All faculty and learners are governed by the University of Arizona, COM, and Arizona Board of Regent policies, and are expected to adhere to them. Violations of these policies will be investigated, and disciplinary action imposed if appropriate.

Professionalism Attributes

These attributes of professional behavior describe those behaviors that are expected from all members of the University of Arizona College of Medicine to include the faculty, residents, fellows, students, staff, and community preceptors. This professional behavior is expected to be upheld during all exchanges including but not limited to face-to-face and telephone/teleconference meetings, texting, video, email, and social networking technologies. COM faculty at the Tucson campus approved the statement of professionalism attributes by a vote conducted in May of 2012.

• Communicate in a manner that is effective and promotes understanding.
• Adhere to ethical principles accepted to be the standards for scholarship, research, and patient care, including advances in medicine.
• Demonstrate sensitivity and respect to diversity in age, culture, gender, disability, social and economic status, sexual orientation, and other unique personal characteristics.
• Strive for excellence and quality in all activities and continuously seek to improve knowledge and skills through life-long learning while recognizing personal limitations.
• Uphold and be respectful of the privacy of others.
• Consistently display compassion, humility, integrity, and honesty as a role model to others.
• Work collaboratively to support the overall mission in a manner that demonstrates initiative, responsibility, dependability, and accountability.
- Maintain a professional appearance, bearing, demeanor, and boundaries in all settings that reflect on the College of Medicine.
- Encourage wellbeing and self-care for patients, colleagues, and self.
- Be responsive to the needs of the patients and society that supersedes self-interest.

Responsibilities of the College of Medicine Faculty and Administrators to Learners

Faculty members and administrators of the University of Arizona College of Medicine shall provide:

- An environment that is physically safe for learners.
- A curriculum in which education is paramount in the assignment of all tasks. In assigning tasks to learners, faculty and administrators shall keep in mind that the primary purpose of such assignments is to enhance the learner’s educational experience.
- Support for the learner’s professional development. This support will include a carefully planned and well-articulated curriculum. Administrators will facilitate the progress of learners through the curriculum. Faculty and administrators will support learners in their personal development as they adjust to the needs and standards of the profession.
- An understanding that each learner requires unscheduled time for self-care, social and family obligations, and recreation.
- Accurate, appropriate, and timely feedback to learners concerning their performance in the curriculum. In assessing learners, faculty and administrators will act in a manner that is consistent with the stated goals of the educational activity, which will in turn be meaningful for future medical practice. In addition, faculty will provide learners with professional and respectful feedback during and after educational and clinical activities.
- Opportunities for learners to participate in decision-making in the COM, including participation on committees that design and implement the curriculum and tools for student performance assessment in accordance with COM bylaws and other governing documents.

Responsibilities of Learners to Faculty and Administrators of the College of Medicine

Learners at the University of Arizona College of Medicine shall:

- Respect the authority of the faculty and administrators in determining the proper training environment and activities for their education.
- Meet the educational goals and objectives of the curriculum to the best of their abilities.
- Take an active role with the faculty regarding the refinement and evaluation of the curriculum.
- Support their colleagues in their professional development.
- Assume an appropriate level of responsibility on healthcare teams and execute assigned responsibilities to the best of their abilities.

Banner Associated Core Behaviors:
All Banner employees:

### Teaching Supervision Duration

How long have you worked with this student? ___________ (days or weeks)

### Feedback to the Learner

Provide effective feedback for minimum two content areas (e.g. medical knowledge, patient care, interpersonal communication skills) that you personally observed and provide the student areas of strengths / ways to improve:

**What makes for effective feedback?** Effective feedback is descriptive and uses non-judgmental language while focusing on specific, observable behaviors (not personality based) and offers concrete suggestions for the learner to attain a higher level of performance.

- **Example 1:** “Her H&Ps were organized, concise yet complete, containing expanded but appropriate differential diagnoses and accurate plans”
- **Example 2:** “Clinical decision making is with minimal error, and he develops strong rapport with families. His next step is to advance his written work to be complete and timely”
- **Example 3:** “(Name of Student) has a superior fund of knowledge and was able to synthesize information and was able to formulate pointed and appropriate questions. Her clinical skills were above average. Her oral presentations were appropriately detailed and concise. She had excellent interactions with patients and families as well as the medical team.”

### Medical Knowledge

- Exhibits appropriate knowledge and understanding of basic pathophysiological processes
- Demonstrates critical thinking and clinical decision making

### Workplace-based assessment: Check-In
Is the student meeting the minimum requirements of:

- At least 2 WBAs submitted per week, for each week so far in the rotation? ___ Yes ___ No
- On track to be assessed on at least 4 different EPAs seen by the end of the rotation: ___ Yes ___ No
- On track to be assessed by at least 2 faculty and 2 residents by the end of the rotation: ___ Yes ___ No

**Written Comments:** What clinical progress/growth is noted in the student’s WBAs to date?

---

### Overall Mid-Point Evaluation Comments
**Strengths:** Overall, what did you observe to be the greatest strengths of this student? Provide minimum 2 specific examples.

**Areas of Improvement:** Provide two specific, observed behaviors where the learner could improve and develop.

**Action Plan:** Provide two specific examples for this student to focus on for growth and development for the remainder of the rotation

### Overall Rating
Based on all criteria reviewed above, how would rate the student as this point of the clerkship:

<table>
<thead>
<tr>
<th>Does Not Meet Expectations at this level in their training</th>
<th>Meets Expectations at this level in their training</th>
<th>Above Expectations at this level in their training</th>
</tr>
</thead>
<tbody>
<tr>

Student Exposure Procedure (Card)

In the event of an exposure, students must follow the following procedure:

1. Remove soiled clothing and wash the exposed area with soap and water, if appropriate. Administer first aid as appropriate to the exposure.
2. Immediately notify attending physician/supervisor of exposure.
3. Students shall present to facility at which exposure occurred for assessment (includes testing of source patient) and initial prophylactic treatment if applicable.
4. If facility is unable to do initial evaluation and obtain necessary bloodwork, patient may come to UA Campus Health Service or ASU Health Service.
5. Students should present the Card to treating health care provider.
6. For Blood/Body Fluid Exposures: Following the incident, the facility at which exposure occurred shall immediately make available to the affected student a copy of all the student’s records relating to the treatment and follow up, and if and when available, results regarding the HIV, HBV, and HCV status of the source, to the extent permitted by law.
7. Following the incident, the student must work with their supervisor/department liaison to complete the online Non-Employee Incident Report Form, located on the UArizona Risk Management Website.
8. Within 5 days of the exposure, the student must follow up with:

TUCSON: University of Arizona Campus Health 520-621-6493
