Policy on Narrative Assessment

TEPC Approved: January 21, 2022

Blocks and courses must incorporate at least one activity that provides students with narrative feedback from a faculty member or resident. Narrative feedback must be in written format, and must focus on specific and objective behaviors or skills. Course coordinators are responsible for collecting documents of completion for each student while the course is still in progress. Documentation will be considered “signed” if physically signed, PDF signed and/or submitted to MedLearn. At the conclusion of each course, signed documentation will be submitted to the Office of Curricular Affairs.
