About the College of Medicine – Tucson

The University of Arizona College of Medicine – Tucson provides state-of-the-art programs of medical education, groundbreaking research opportunities, and leading-edge patient care. Founded on the campus of the University of Arizona in 1967 as the state’s only MD degree-granting college and a resource for the people of Arizona, today the UA College of Medicine ranks among the top medical schools in the nation for research and primary care. From an initial class of just 32 students, the UA College of Medicine today has graduated more than 4,000 physicians. College of Medicine students, faculty, staff, and alumni today continues more than 50 years of service in advancing medical care and knowledge in Arizona—and around the world.

Clerkship Phase Expectations and College of Medicine - Tucson Educational Program Objectives

The [MD Program](#) at the College of Medicine is designed to train highly skilled physicians dedicated to improving patient care and advancing the state of medical knowledge.

The clerkship phase of study is defined as the 12-months of eight core clerkship courses: Ambulatory Medicine, Family and Community Medicine, Medicine, Neurology, Obstetrics and Gynecology, Pediatrics, Psychiatry, and Surgery. The Intersessions I & II and Transition to Clerkship courses are also included in this phase of the curriculum. The Clerkship Phase includes clinical site participation at sites throughout the community and rural Arizona. The learning during this phase is comprised of the comprehensive and longitudinal care of patients in a clinical setting, as well as interactive learning sessions and simulation activities. Students are challenged in six educational competencies central to the practice of medicine: patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice and population health. These [Educational Program Objectives](#) can be found in their entirety on the COM-T website.

The clerkship experiences at the University of Arizona College of Medicine - Tucson campus are intended to expand your breadth of knowledge of medicine based on the foundation of your pre-clerkship training at our institution. The clerkships are full-time learning experiences and Curricular Affairs works closely with each department to identify, recruit, and maintain a wide array of sites that offer a range of individualized learning experiences around a core set of goals and specific patient encounters.

Learning experiences are unique to everyone, and it is important to understand the learning process can and does occur through many avenues. Both passive (i.e., observing and/or shadowing) and active learning (i.e., hands-on) serve the educational mission and provide you with the necessary skills to become a safe and effective future physician. At any given site, we have a diverse array of learners, including residents; therefore, hands on participation is often not possible. While it is unlikely that you will actually perform a laparoscopic appendectomy or deliver a baby by yourself, learning is occurring while holding the laparoscopic camera and by observing the birth process. Your expectations of the clerkships need to be realistic considering the learning environment and the presence of other learners.

Remember, much can be gained by a positive attitude, a desire to learn, and focused observation.
Clerkship Organization and Requirements

Clerkship Directors and Coordinators Contact Information

The clerkship directory can be found by clicking here.

Sites

Our Clerkships rotate to various sites throughout the community and in rural areas of Arizona. The sites for each individual clerkship rotation may vary depending on the availability of the preceptor and slots available per rotation. Please reference Student Assignments to Instructional Sites disability or contact the Clerkship Coordinator directly for site selection procedures or additional site information and availability prior to beginning your rotation.

In the event you are assigned to a site with faculty who is or has been a personal healthcare provider for you, this is a conflict of interest. If this occurs, as soon as the site assignment is known, you and/or your site faculty must inform the clerkship coordinator and director of the conflict to allow ample time for site re-assignment.

Attendance Requirements

All clerkship experiences are mandatory including NBME Shelf Exams, Clerkship OSCE, Transition to Clerkships, and Intersessions I & II. Any absence must be recorded in MedLearn a minimum of 30 days prior to the anticipated absence. Excused absences will be remediated as deemed appropriate by the Clerkship Director. When encountering issues recording absences in MedLearn, submit a “Give Feedback” form to have your issue addressed by the MedLearn team. For additional information on Attendance Requirements, please see the:

- Attendance and Absence Policy
- Leave of Absence Policy

Medical Student Duty Hours

The Duty Hour Policy is created to parallel Accreditation Council for Graduate Medical Education (ACGME) standards, with the understanding that medical students are supervised in all patient care activities and do not make independent patient care decisions. As a result, the Duty Hour Policy for medical students follows ACGME stipulations for a PGY 2 resident and will support maximum educational benefit for students. Students are required to document duty hours in MedLearn and adhere to the Medical Student Duty Hours Policy for all clerkship rotations.
Formative and Summative Assessment

Mid-Clerkship Formative Feedback

A mid-clerkship assessment for each student is required. The mid-clerkship assessment will be completed by the Clerkship Director, Site Director, or a designated faculty member at the student’s primary clinical site using the College of Medicine – Tucson Mid-Clerkship Assessment Form. This form includes performance criteria, as well as a portion for narrative comments. The student’s mid-clerkship performance must be reviewed in a one-on-one meeting with a Clinical Site Director or designee, and the student and Clinical Site Director or designee must sign the Mid-Clerkship Assessment Form as an acknowledgement of the assessment. The timing of the mid-clerkship assessment is during a specific window of dates as specified by policy and LCME, but generally is expected to be at the mid-point of each clerkship rotation.

Assessment of Student Performance

Faculty and resident assessment of student performance will be collected via New Innovations, an online medical education management system. The system is used by the clerkships to collect data on (1) faculty assessment of student performance, (2) student feedback on instruction, (3) student feedback on sites, and (4) student feedback on clerkships. Assessment data contributes to the determination of student grades and feedback provides information on the effectiveness of instruction, educational experiences at sites, and the clerkships as a whole.

Faculty and residents with whom you have worked will be requested to complete the Assessment of Student Performance in New Innovations through a schedule matching system based on student rotations and dates of service that are the same as each of the faculty and residents. An email will be automatically sent by the system to evaluators as evaluations become available as well as periodic reminders thereafter until completed. If there are questions about how evaluations are matched to faculty and residents, students should discuss the process with the Clerkship Coordinator.

For your access to New Innovations, your Net ID serves as your username and password:

Student Assessment of Clerkship, Site and Instruction

Students must complete program evaluation surveys for each assigned site within a clerkship, the clerkship rotation as well as evaluations of attendings and residents in New Innovations. **Clerkship grades will be withheld unless surveys are completed within two weeks of the clerkship’s end date.**

Student feedback data is reported by Curricular Affairs to the clerkship directors in aggregate in the form of a composite, de-identified report twice per academic year in January and July. All student comments are also de-identified in the report.

If you have any questions, please consult with the Clerkship Coordinator, or email the Clinical Education team in Curricular Affairs at clerkshipadmin@arizona.edu

An Introduction to Workplace Based Assessment (WBA)

WBA is a reliable, valid form of assessment in use in medical education for over ten years. WBAs are used to provide regular assessments of student progress across Entrustable Professional Activities (EPAs). The transparency in student progress in clerkship, the autonomy provided to the student in seeking their own assessments and feedback, reduction in bias in grading, and alignment with our school’s competency-based education philosophy were all reasons approved at TCCS and TEPC committees to adopt WBAs for clerkship.

Below are short videos outlining the WBA process:

Introduction
[https://arizona.hosted.panopto.com/Panopto/Pages/Viewer.aspx?id=189e983e-dd20-4c74-85e2-accc00ff8cda](https://arizona.hosted.panopto.com/Panopto/Pages/Viewer.aspx?id=189e983e-dd20-4c74-85e2-accc00ff8cda)

Entrustment Scale

Getting Ready for WBA in Clerkships

Where to Store your QR Code and URL for WBA

**Saving your QR code:**
1. Save or flag the email so you can refer to it throughout your clerkship phase.
2. Take a screen shot of your QR code and save it in your ‘Favorites’ photo album or any other easily accessible location on your phone (e.g., text it to yourself, save it as a document in your files, save it in your notes, etc.)
3. Print your QR code and attach it to the back of your badge or insert it in your badge holder.
Saving your URL:
1. Save or flag the email so you can refer to it throughout your clerkship phase.
2. Copy and paste the link to your notes on your phone or computer so that you can easily find it to be able to send it to the faculty.
3. Save it as a bookmark on your desktop or phone web browser. Follow the instructions online at: https://www.howtogeek.com/196087/how-to-add-websites-to-the-home-screen-on-any-smartphone-or-tablet/ 

Preparing To Receive Feedback

A key part of being a successful learner is being able to receive feedback. In preparing for growth this year – and throughout your career – there are three skills:
1. Deliberate practice. Deliberate practice is pinpointing something specific to improve and getting feedback on it. Watch this 3- minute video from Dr. Angela Duckworth, who explains how deliberate practice works: https://www.youtube.com/watch?v=5itYr20uUtk
2. Growth mindset. Feedback is only effective if you can receive it, and integrate it. Learn more about growth mindset in this 3-min orientation video: https://www.youtube.com/watch?v=_qlCa4LIabg
3. The third key step is grit. Grit is to persevere and be passionate over time; it is a quality of endurance over time. Your ability to stay engaged in your growth over time matters in clerkship – and throughout your career. Learn more about Grit from Dr. Angela Duckworth (6 mins): https://www.youtube.com/watch?v=H14b8uluwB8

How to Ask Faculty and Residents to complete a WBA

Asking for feedback is a natural part of our professional days, and a key tool in our professional growth. Acknowledging that there is a power differential between students and faculty, fellows, or residents, several resources will be shared during the Transition to Clerkship block.

Getting Familiar with the EPAs

What are EPAs?

Entrustable Professional Activities (EPA) were published by the AAMC in 2014 as the activities all medical students should be able to perform upon entering residency, regardless of their future career specialty. EPAs provide a practical approach to assessing competence in real-world settings and impact both learners and patients.

For more information, visit https://www.aamc.org/what-we-do/mission-areas/medical-education/cbme/core-epas

Which EPAs will students be assessed on?
Throughout the Clerkship Phase, students will be assessed on 8 different EPAs which are listed below.

EPA 1: Gather a History and Perform a Physical Examination
EPA 2: Prioritize a Differential Diagnosis Following a Clinical Encounter
EPA 3: Recommend and Interpret Common Diagnostic and Screening Tests
EPA 5: Document a Clinical Encounter in the Patient Record
EPA 6: Provide an Oral Presentation of a Clinical Encounter
EPA 7: Form Clinical Questions and Retrieve Evidence to Advance Patient Care
EPA 8: Give or Receive a Patient Handover to Transition Care Responsibility
EPA 9: Collaborate as a Member of an Interprofessional Team

Each clerkship has agreed to assess students on a minimum of 4 different EPAs. It is important that students are aware of the EPAs that correspond to each clerkship so that they can meet the assessment requirements. The table below outlines the EPAs that will be assessed in each clerkship.

**Table 1. EPAs by Clerkship**

**WBA EPA Requirements**
Students are required to be assessed on a minimum of 4 different EPAs during each clerkship. Students should only be assessed on the EPAs selected for that clerkship which is shown in Table 1. Failure to meet these WBA EPA requirements for a clerkship will result in receiving a grade of 0 and failing the clerkship.
1. Ask “Can you please assess me on (insert name of presentation, task or procedure)?”

2. Show your QR code and/or email the URL to your unique assessment form to the attending or resident assessing you.
   a. If you show the QR code, the attending or resident uses the photo function to scan the QR code. Your unique assessment form will appear on their web browser.

3. Confirm the attending or resident has the form loaded on their device.
4. Confirm that the picture and student name on the survey is correct.

5. Tell the attending or resident which EPA you want to be assessed on. The EPA list is available on the form.

6. Complete the presentation, task, or procedure.

7. Ask the attending or resident to complete their assessment.
   a. They may use speech-to-text to enter in comments.

8. Before selecting ‘Submit’, the attending or resident needs to enter in their name and identification number.
9. Once submitted, a confirmation email goes to the attending or resident who completed the assessment. If you have falsely filled in a WBA, the attending and resident will be alerted, as will the Office of Curricular Affairs.

10. After the rater submits the WBA, your dashboard will be updated in 24 hours. Check your dashboard often to keep track of your progress in each clerkship.

If you encounter issues obtaining WBAs, please contact your clerkship coordinator and/or director, the Clinical Education Team (wbaadmin@arizona.edu).

**Grading for WBA**

A grade of “pass” is awarded for 20% of the grade when a student has completed:
- A minimum of an average of one completed WBA form per week for each week of patient interaction in the clerkship block
- A minimum of 4 different Entrustable Professional Activities (EPAs) seen by end of each clerkship block. Each clerkship director sets the specific EPAs, and this must be documented and communicated to faculty and students.
- A minimum of 2 faculty members and 2 residents must complete WBA assessments for the learner where possible. If no resident is present in a clinical block or rotation (e.g., rural rotations, some community clinic rotations), then only the attending assesses the learner a minimum of two times a week.

Students can and are encouraged to obtain more than the required minimum number of WBAs.

What constitutes “fail” in WBA:
- Not meeting the minimum in one or more WBA requirement(s), as listed above
- Being evaluated by an individual who is not an attending or resident (e.g., peer, friend, family member, etc.). This constitutes academic dishonesty and is subject to the consequences outlined in the Honor Code policy, including academic dismissal.

Note: Grading for WBA is “all- or-none”. That is, students are awarded 20% for completing the minimum WBA requirements as outlined above and in the policy. If students do not meet the minimum by the end of the last day of the rotation, they are awarded 0% for this portion of the final clerkship grade. There is no remediation period.
WBA Dashboard

Accessing your WBA dashboard

Each student will have a personal, secure WBA dashboard. Clerkship directors and coordinators will have a summative dashboard, showing all students within their specific clerkship. Curricular Affairs staff have a summative dashboard showing all students in all clerkships.

Students can access their personal dashboard through MedReports. Students should protect their dashboard’s personal assessment data and are responsible for keeping it private. To access, select the WBA option from the MedReports drop down menu.

If you encounter issues, please email WBAAdmin@email.arizona.edu

Orientation to the WBA dashboard

The dashboard provides a summary of the key information needed to ascertain if you are meeting the minimum requirements for the WBA part of your grade, as well as the ability to see your progress over time.

A sample dashboard with fake student data is below:

Dashboard Features:
Section 1: Filters. Click on the drop-down arrow to select, which filtered data to display. To remove the filter, click on the selected item again. You can apply multiple filters at once to create a more precise review of the data.
Section 2: Summary of Progress to Date. This section shows your WBA scores by date, so you can see how you are improving over time. You can filter by date, to see how you are doing at midpoint and final in each clerkship, as well as across the clerkship year.
Section 3: Feedback and Comments. The comments entered by the attending or resident on each WBA can be searched, reviewed, and filtered.

Section 4: Summary of Progress. This panel provides a quick overview of the minimum metrics you must meet to pass the clerkship. You can filter by date to see how you are doing at the midpoint, and at the end of the clerkship.

Section 5: Summary of Ratings to Date. This graph provides an overview of how entrustable you are becoming across all EPAs. It will shift over time to reflect your growing entrustment.

WBAs and the Mid-Clerkship Formative Feedback Form

How to complete the mid-point feedback form for each clerkship

In addition to the traditional Mid-Clerkship Formative Feedback Form, questions related to the WBAs have been added.

Students are required to have their dashboard loaded on a device (phone, tablet, laptop, etc.) and to filter their dashboard to correspond to the appropriate clerkship. Students will show their dashboard to the evaluator so that they can accurately complete this section of the form. If the student is concerned about experiencing technical difficulties when presenting the dashboard, they can provide screenshots of the dashboard within 24 hours prior to the meeting and present the still image.

A sample of the WBA-related questions on the Mid-Clerkship Formative Feedback Form is provided below:

**Workplace-based assessment: Check-In**

Is the student meeting the minimum requirements of:

At least 1 WBA submitted per week, for each week so far in the rotation? ___ Yes ___ No

On track to be assessed on at least 4 different EPAs seen by the end of the rotation: ___ Yes ___ No

On track to be assessed by at least 2 faculty and 2 residents by the end of the rotation: ___ Yes ___ No

**Written Comments:** What clinical progress/growth is noted in the student’s WBAs to date?

Frequently Asked Questions

*How will I know how I’m doing on achieving the minimum requirements?*

The dashboard is always available to you to search and review progress to date.

Midpoint clerkship meetings should focus on if you are meeting the minimum requirements and discuss a plan on how to achieve the requirements.

*Do WBAs need to be completed in the first week of a clerkship block?*

For clerkships starting with a week of orientation, simulation or other activities, students are not responsible for WBAs that week, though they may choose to use simulation events as a way of practicing asking for feedback using the WBA form. That is, the average of 1 WBA per week applies only to the number of weeks focused on patient encounters.

*Can I complete WBAs all in one week or in a shortened time in the patient interaction weeks?*

No. The point of WBAs is to continually seek feedback and show growth over time. Students, therefore, need to be collecting WBAs across each week of clinical interaction within a clerkship block.

*What if I miss one WBA in a week? Can I make it up?*
There are no formal WBAs labelled “make up” WBAs. As per policy, students must complete an average of 1 WBA for each week of patient interaction throughout each clerkship. Additionally, as a key reason for WBAs is showing a growth in your abilities over time, students need to be collecting WBAs across each week of clinical interaction within a clerkship block.

**Can I make up WBAs after a clerkship block has finished?**
Students cannot make up WBAs after the clerkship has finished. “Extra” WBAs completed in one clerkship cannot roll over to another clerkship. Failure to meet the minimum requirement of 1 per week of patient encounters within the clerkship block will result in a grade of 0.

**What if I don’t complete the minimum required WBAs, EPAs, or a variety of assessors?**
As per policy, students would receive a grade of 0 for this part of the clerkship grade.

**Who do I contact if I need help with the WBA form or dashboard?**
Please email WBAAdmin@email.arizona.edu with any technical issues regarding the WBA form or dashboards.

### Grading Criteria

The grade in a clerkship is based on a student’s performance in the six competencies. The final grade is a composite grade, using a formula designed by each clerkship director, the common assessment form, test scores, and other evaluation tools. The composite clerkship grade is divided into four categories: Honors, High Pass, Pass, or Fail (H, HP, P, F). The grading rubric for each clerkship is as follows:

<table>
<thead>
<tr>
<th>CLERKSHIP</th>
<th>GRADING RUBRIC</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ambulatory Medicine (Graded P/F)</td>
<td>Clinical Assessment 50% 20%</td>
</tr>
<tr>
<td></td>
<td>Workplace Based Assessment 20%</td>
</tr>
<tr>
<td></td>
<td>Preparedness and Proactiveness 5%</td>
</tr>
<tr>
<td></td>
<td>Advocacy 5%</td>
</tr>
<tr>
<td></td>
<td>Professionalism 20%</td>
</tr>
<tr>
<td>Family &amp; Community</td>
<td>Please refer to clerkship syllabus for more information on grading.</td>
</tr>
<tr>
<td>Medicine</td>
<td>Clinical Assessment 50%</td>
</tr>
<tr>

<tr>
<td>Neurology</td>
<td>Clinical Assessment 50%</td>
</tr>
<tr>
<td></td>
<td>Workplace Based Assessment 20%</td>
</tr>
<tr>
<td></td>
<td>NBME Shelf Exam 15%</td>
</tr>
<tr>
<td></td>
<td>OSCE 10%</td>
</tr>
<tr>
<td></td>
<td>Professionalism 5%</td>
</tr>
<tr>
<td>OB-GYN</td>
<td>Clinical Assessment 50%</td>
</tr>
<tr>
<td></td>
<td>Workplace Based Assessment 20%</td>
</tr>
<tr>
<td></td>
<td>NBME Shelf Exam 15%</td>
</tr>
<tr>
<td></td>
<td>H &amp; P 5%</td>
</tr>
<tr>
<td></td>
<td>OSCE 5%</td>
</tr>
<tr>
<td></td>
<td>Professionalism 5%</td>
</tr>
<tr>
<td>Pediatrics</td>
<td>Clinical Assessment 50%</td>
</tr>
<tr>
<td></td>
<td>Workplace Based Assessment 20%</td>
</tr>
<tr>
<td></td>
<td>NBME Shelf Exam 15%</td>
</tr>
<tr>
<td></td>
<td>Student Attending 10%</td>
</tr>
<tr>
<td></td>
<td>Professionalism 5%</td>
</tr>
</tbody>
</table>
Professionalism accounts for at least 5% of your grade and is an all- or- nothing component. A significant lapse and/or a pattern of lapses will result in a deduction of the full 5%. The Clerkship Director makes the final decision.

The following list, while not exhaustive, should help clarify what is included in the Professionalism grade throughout the clerkships. In addition, students are expected to follow the College of Medicine – Tucson policies for Professionalism and Integrity.

Students will:

- Complete credentialing paperwork and site-specific requirements such as, but not limited to, fingerprinting and drug screening, by the stated deadline.
- Complete assignments by their due date. This includes, but is not limited to, the following:
  - MedLearn (Duty hours, H&P feedback, Patient Logs)
  - Surveys (e.g., New Innovations)
  - Logged Observed History and Physicals
  - Mid-Clerkship form
  - Return of books and other borrowed items
- Respond to emails in a timely manner (within 2 business days).
- Refrain from using cell phones during meetings/sessions/didactics.
- Always inform your team/preceptor of your whereabouts.
- Be considerate to staff, faculty, residents, and patients.
- Be on time for required meetings/sessions and do not leave without permission or until dismissed.
- Sign-in for didactics or other activities when requested ONLY for yourself.
- Be punctual and comply with NBME Shelf Exam rules.
- Obtain advance permission from the Clerkship Director/Coordinator for absences from activities and/or wards per policy; inform appropriate residents and/or attendings.

A clerkship reserves the right to assign a failing grade for the entire clerkship if a student performs in an unprofessional manner in terms of interactions with patients and other health professionals, completing assignments, attendance at scheduled activities, or other inappropriate actions or activities.

**NBME Shelf Exam**

All clerkships except for Ambulatory Medicine administer the NBME Shelf Exam on the last day of each rotation to all students. The Clerkship Coordinator will notify students regarding the time to report and testing location. Each student will take the electronic NBME shelf exam with their personal laptop. The time allotted for the exam is 2 hours and 45 minutes. For students required to retake a
failed Shelf Exam, please see the [Grading and Progression Policies](#) in the [Grading In Clerkships](#) section.

Shelf Exam scores and individual NBME score reports are emailed to students the Monday following their exam. Passing norms for each clerkship are different and based on national norms. Please refer to each clerkship’s syllabus, for more information.
Academic Participation Requirements

COM Requirements for Student Participation in Clerkship Phase

1. **Basic Life Support (BLS):** A valid Basic Life Support course completion card is required for student participation in the Clerkship Phase. This requirement must be completed prior or during Transition to Clerkships. Certification is valid for two years. Proof of certification must be submitted to the Student Affairs office and kept in the student record.

2. **Mask Fit Testing:** Prior to beginning the Transition to Clerkship course, students must have been fitted for respirators that fit tightly to their face in accordance with OSHA protection standards. The University of Arizona CUP Program administers the UA Respiratory Protection Program. Proof of certification must be submitted to the Student Affairs office and kept in the student’s record.

3. **Observed History and Physical:** Students are required to be observed at least once per clerkship taking a medical history (partial or complete) and performing a physical exam (partial or complete). Students must document this observation in MedLearn. Under the H&P tab on your home page, enter the date of the observation, the name of the observer, and whether the observer was a faculty/preceptor or resident. It is necessary to document only one observation per clerkship.

**Student Health & Safety**

The safety and security of our students is of utmost importance. Students should review all relevant safety, emergency contact information, hospital codes, evacuation plans, security policies, and procedures at assigned locations. Emergency contact information for the student and for the facility where they are assigned should be distributed to each party and maintained in a previously identified location. For additional information and policies related to student health and safety, please visit the [College of Medicine – Tucson Student Policies](#), Student Safety and Security section.

**Active Shooter/Armed Individual on UA Campus**

When an active shooter is in your vicinity, quickly determine the most reasonable way to protect your own life. Students, employees and visitors are likely to follow the directions of instructors, supervisors and administrators during an active shooter situation. See [Active Shooter/Armed Individual](#) link for more information.

- Run
- Hide
- Fight

*For away rotations, please identify and follow site procedures*

**Student Occupational Exposure**

In the event a student is exposed (i.e. needle stick, inhalation, mucus membrane or skin exposure, or percutaneously to infectious agents and/or hazardous materials including blood/body fluids) while engaged in a university-sponsored educational program, the student must seek and obtain prompt medical attention, including counseling, prophylactic drug treatment, and baseline and follow-up laboratory values, as necessary. See [Student Occupational Exposure Policy](#)

**Urgent/Emergent Health Care Services**

If a student participating in a preceptorship or a rural health professions placement located outside Tucson or Phoenix requires urgent or emergency health service, their preceptors will refer the student to another member of the practice or another physician who can competently care for the student and
who is not involved in the academic assessment or promotion of the medical students. The preceptor will retain the authority to countermand this provision if the student requires more immediate attention than would be possible through a referral for care. The preceptor will assure that the medical student is directed to services in a timely manner. In the event of any emergency related to the student from the University of Arizona College of Medicine - Tucson, the Student Affairs office should also be contacted:

**Tucson**  
Office of Student Affairs  
Dr. George Fantry, Senior Associate Dean of Student Affairs  
Contact number **520-626-6216**

### Disability Resources

The University of Arizona is committed to inclusion and accessibility. The **Disability Resource Center** (DRC) is the campus department designated by the University to determine and provide access to university classes, programs, and activities for disabled individuals on main campus, Banner University Medical Center – Tucson, Banner University Medical Center - South, College of Medicine – Phoenix, and UA Online. Through an interactive process, DRC facilitates access either through determination of a reasonable accommodation or by redesigning aspects of a university experience. The processes are designed to be convenient for students.

**Accessibility and Accommodations**  
It is the University’s goal that learning experiences be as accessible as possible. If you anticipate or experience physical or academic barriers based on disability or pregnancy, please let the Clerkship Coordinator know immediately. You are also welcome to contact Disability Resource (520-621-3268) to establish reasonable accommodations.

Disability Resource Center  
1224 E. Lowell St.  
Tucson, AZ 85721  
drc-info@email.arizona.edu

Please note, implementing accommodations can take several days to weeks, depending on the request. It is the student’s responsibility to timely seek accommodations and the student must allow adequate time for the interactive process. Accommodations may not be available on short notice and testing will not be delayed for pending requests. Accommodations will not be granted retroactively.

**Disability Insurance**  
The College of Medicine has secured a group disability insurance plan through Guardian for all medical students. This plan is both comprehensive and affordable and does not require any pre-issuance testing or medical examinations.

### Credentialing Requirements

Medical Students must complete the mandated credentialing documentation that is required by each of our clinical partner institutions and provide the required documents. Each clinical affiliate may have additional paperwork specific to their site. The Clerkship Coordinator will work with you to be sure all appropriate documentation is completed and submitted prior to any on-site experiences.

The College of Medicine – Tucson has collaborated with [myClinicalExchange](#) to house required documents that are designed to allow medical students to electronically submit important paperwork to the College of Medicine – Tucson and clinical partner institutions.
MedLearn

During the clerkship phase, students use MedLearn to log duty hours, required clinical patient encounters and alternative experience submissions.

**Duty/Shift Hours Entry**
Students may be required to log their on-shift and off-shift hours in certain rotations to maintain compliance with program requirements.

**Logbook Case Entries**
To ensure timely progress, students are advised to update their logbook with required cases on a weekly basis. This practice is crucial for staying on track for completion prior to the mid-clerkship feedback session.

**Alternate Experience Submissions**
Should a student be unable to complete a required logbook case, they have the option to request an alternate experience, as outlined in the course syllabus. These requests must be submitted for approval to the course coordinator.

**Entering in Duty Hours:**
- Click the “Clerkship” tab from the navigation menu
- Choose “Duty Hours” from the dropdown options
- Press the “Log Hours” button to add duty hours
- Choose the “Hour Type”
- Fill in the shift date, start time and shift length
- Click submit to finalize the entry

Note: You are only able to enter and edit entries for the duration of the rotation.

**Entering Logbook Entries:**
- Select the “Clerkship” tab from the navigation menu
- Choose “Logbook” from the options
- Click the green “Log Entry” button
- Use the “Rotation” dropdown to pick your current course.
- From the “Clinical Tasks” dropdown, select or search for the task you need to log.
- Fill in all fields marked with red asterisks *(required fields).*
- Click “Save” to submit your entry.
After submission, you'll be directed to a page displaying all your previous entries and a tracking of your requirements. The completion percentage is shown at the bottom of the page and is interactive for more details.

Submitting an Alternative Experience Requests
- Click the green “New Request” button
- Select your course from the dropdown list
- Click the Case/Procedure dropdown and select the requirement for which you are requesting an exception
- Enter the Site and the Alternative experience.
- Provide a written explanation in the designated field.
- Click “Submit” to send the request

After submission you are taken to a list of your prior submissions, where you can also see the course coordinator approval status.

For more information on how to use MedLearn and other College of Medicine – Tucson educational applications, please visit MedDocs for Students by clicking here.

Required Clinical Patient Encounters and Educational Applications

While enrolled in each clerkship, students are required to experience and document several required clinical patient encounters/conditions in MedLearn. A list of required clinical patient encounters/conditions can be found in each clerkship’s syllabus. It is the student’s responsibility to review this list for each clerkship and ensure compliance by the end of each clerkship rotation.

Alternative Experience

If a student is unable to experience a required Patient Case/Clinical Condition/Skill, they must complete an alternative experience. All alternative experiences must be approved by the clerkship director.

Instructions for how to submit an alternative experience request:
https://meddocs.medicine.arizona.edu/MedLearn_Clerkship_AltExp/

Direct link to submit an alternative experience request:
https://medlearn.medicine.arizona.edu/clerkship/altexp

Please refer to each clerkship’s syllabus for more information on alternative experiences.

Duty Hours

This policy describes how to schedule and document medical student duty hours. Rules are designed to protect patient and student health, and to comply with the latest standards defined by the Accreditation Council for Graduate Medical Education (ACGME). The policy can be accessed by clicking here.
Zoom Etiquette for Curricular Sessions

Zoom may be used for remote curriculum delivery in the clerkship phase of the MD program. This guide has been assembled to share expectations and tips for successful participation while using Zoom.

Arriving at your Zoom session
Log-in to the Zoom application on your laptop for the best functionality. It is best to download the Zoom Client.

Display your full name in Zoom, rather than an alias. For example, “Mike Martinez” is fine but “#1MedStudent Smith” doesn’t help your colleagues address you appropriately. This is the equivalent of wearing a name tag in person.

Plan to arrive to each Zoom session 5 minutes prior to the session.

Body language and presentation
As is the case with in-person meetings and presentations, eye contact in video calls can be a very important factor. In a formal context, such as a presentation or providing patient care, speak while looking at camera lens, to simulate looking at your audience; this increases your presence and authority, as well as building trust and engagement with your peers and facilitators. For the duration of the Zoom session, students must have their camera turned on, unless otherwise instructed by the course director/instructor.

Remember you can encourage and respond to your colleagues non-verbally with nodding and smiling. When attending a synchronous lecture, Speaker View is recommended to focus attention on the lecturer and maximize content on screen.

Camera positioning, microphone testing, and internet connections
Ensure your camera is elevated to give straight-on perspective during your call. Adjust the camera positioning and check before starting the call to ensure you are framed properly; center yourself in frame horizontally and position your eyes within the top third of the screen. Obtain a high-quality web camera if you are using a desktop. For laptops, the built-in camera should be adequate.

If possible, use a headset. This will greatly reduce the chance for audio feedback and improve your voice quality for those who are communicating with you. Headsets that connect via USB are the best choice. Test your microphone and video settings beforehand to ensure that all technical aspects are working properly, you are set up correctly, and you are visually prepared to participate in the Zoom.

When possible, connect to the Internet with a physical cable connection, not Wi-Fi. This will give you much greater speed and service. A laptop or desktop is preferred over a Smartphone or tablet. Anticipate unexpected outcomes, such as physical or technical interruptions, with patience.

If you are having video refresh issues, you should consider turning off Enable HD in your video settings. If that does not help, with permission, you can turn off your video. This is not ideal for your participation in the Zoom meeting, so you should continue to engage using audio and chat, as appropriate.

Lighting & backgrounds
Position the camera so that you are facing a light source. A light source behind you (backlighting) will prevent your colleagues from seeing your expression since your face will not be visible. The best lighting is natural light, though direct sunlight may cause your eye strain or the appearance of overexposed video; if no natural light is available, use a lamp. You may have to rearrange furniture to get the best setup for Zoom.
Make sure you are aware of your surroundings when enabling your video. Bright lights and movement or other distractions may detract from others’ ability to concentrate on the topic at hand. Select a plain, uncluttered background. If you do not have access to a location that would provide a plain background, then we suggest using a virtual background. Please note that virtual backgrounds can cause visual pixelation, and video distortion if you move around as you participate. Select a virtual background that is not distracting to your colleagues. If you have trouble with your video, you may need to disable virtual backgrounds because they do need a lot of CPU power.

**Discussion and questions**

While in the Zoom meeting, keep your audio muted unless you are speaking. This keeps noise distraction to a minimum. Pressing and holding the space bar is a quick way to unmute your audio. You will be muted again when you release the space bar. Please note that this quick method will not work if you are typing in the chat.

For large groups or lecture sessions, please check the method of question collection. The lecturer may pause and ask for questions over audio, or you may be asked to submit questions over chat to be collected by a moderator and shared with the lecturer.

Chat is a useful feature in Zoom. Professional communication is expected in the chat. Please keep chat conversations on topic as a sign of respect for your faculty and classmates. Your moderators can see all chats, even private messages to other students.

In addition to chat, there are reaction buttons (thumbs up and clapping) that can be used in informal situations.

**Other tips**

Remove any distractions you can before you start or join a video call, including the following:

- Silence personal devices
- Set up in a quiet location
- Use ethernet cable instead of Wi-Fi for a stable experience. The UA Health Sciences Library is open, and students may book rooms to attend using UACOM-T Wi-Fi use 630 AM-midnight, Monday to Friday. There are also hotspots around campus.
- Don’t check email/phone/web while on Zoom meeting, as other participants can easily tell when you are distracted.

Avoid participating outside. Wind and background noise may muffle your voice or prevent others from being heard.

Minimize the number of programs running while using Zoom. Close all unnecessary applications during your call to maximize processing power to be used on the quality of your Zoom session. Ideally, this would be Zoom and the program where you take notes, like OneNote.
Academic Policies and Institutional Resources

**Alcohol and Substance Use/Abuse**

The University of Arizona Statement on Drug Free Schools and Campuses: Under Federal legislation entitled the Drug Free Workplace Act of 1988, and the Drug Free Schools and Communities Act of 1989, no institution of higher education shall be eligible to receive funds or any other form of financial assistance under any federal program, including participation in any federally funded or guaranteed student loan program, unless it has adopted and implemented a program to prevent the use of illicit drugs and abuse of alcohol by students and employees.

**Indian Health Service (IHS) Drug Regulations for Clinical Sites**

Housing on tribal lands is subject to federal law in addition to tribal law. Federal law prohibits the sale and use of alcohol on tribal lands; it also prohibits the possession of any alcoholic beverage, including, but not limited to beer, wine, and spirits. While students are at an IHS site, they are expected to be respectful guests and abide by these laws. Alcohol is not allowed and failure to comply could result in arrest and citation by tribal officers, as well as disciplinary action by the University.

The only exception to this law is when the tribal body and state have legally authorized the use, possession, and sale of alcohol. If you have any questions or concerns, contact your Clerkship Coordinator.

Note: While Arizona has instituted a cannabis program, this substance is prohibited at most IHS sites and tribal reservations.

University of Arizona Statement on Drug Free Campus

- **Tohono O'odam**
  - Alcohol - Chapter 12
  - Marijuana - Chapter 13: Section 13.6

- **Hopi Code**
  - Chapter 15: §3.15.1

  - Alcohol - Health & Safety Code Section 11.1
  - Marijuana - Criminal Code - Section 2.56

**Professionalism and Integrity**

There are numerous policies that define and outline best practices of professionalism. The College of Medicine has established a comprehensive policy for the community, titled “Policy Regarding Professionalism and Reporting Misconduct for Faculty and Learners”. This comprehensive document provides information regarding the definition of professionalism and related policies.

The Professional Conduct Comment Form provides a process for faculty, residents, fellows, medical students, and
staff to comment upon either exemplary professional behavior OR lapses in professional behavior
demonstrated by faculty, residents, fellows, medical students, or staff in the learning environment at the
University of Arizona College of Medicine. For additional information and policies related to professionalism,
please visit the College of Medicine – Tucson Student Policies, Professionalism and Integrity section.

For additional guidelines and information see the Mistreatment Guidelines and the Office of
Institutional Equity.

### Informed Consent Regarding Pelvic Examination: SB 1027

According to TITLE 32, CHAPTER 32, ARTICLE 1, of the ARIZONA REVISED STATUTES, it is an act of
unprofessional conduct for anyone to perform or supervise an individual who performs a pelvic
examination on an anesthetized or unconscious patient without first obtaining the patient's informed
consent to the pelvic examination, unless the performance of the pelvic examination either:

1. Is within the scope of the surgical procedure or diagnostic examination to be performed on the
   patient for which informed consent has otherwise been obtained.
2. In the case of an unconscious patient, is required for diagnostic purposes and is medically
   necessary.

### Library

The Health Sciences Library is open to UAHS affiliates with an active Cat Card. Find resources for
medical students, reserve books, reserve study rooms, and e-books. To enjoy the library resources,
students must log in with their UA NetID and password for full access. Start your library search by
clicking [here](#), type in a keyword, then click on “Sign-In” and continue to sign-in using your UA NetID
credentials.

Clerkship specific library resources can be accessed be clicking [here](#).

### Student Development

The Office of Student Success aim is to support all students in meeting their academic potential through
the delivery of evidence-based academic support services and resources. We work in collaboration with
departments, units, and offices across the college to empower students to develop a life-long learner
mindset in pursuit of academic excellence. The Office of Student Development offers the following
services: peer tutoring, individualized study plans, learning specialists, USMLE Step 1 and 2 exam
preparation, NBME practice exams for Step 1, Step 1 retakes, block exam reviews, block remediation
assistance, workshops/presentations, and subject-specific exam preparation. To make an appointment
with the Office of Student Development, please contact your learning specialist. Contact information
can be found by clicking [here](#).

### COMhelp

COMHelp is COM-T's communication web portal for all your IT needs. COMHelp will support all services
provided by our team, such as email, iPad applications, MedLearn, ExamSoft, Oasis, and UAccess.

### Cerner

Please contact the Banner Health IT Help Desk at 602-747-4444, Option 1 if you experience issues
logging into/accessing Cerner.
Parking and Transportation Services

The Department of Parking and Transportation Services provides creative solutions for campus access and promotes alternative transportation for faculty, staff, students, and visitors at the University of Arizona. Visit the website to find out more information on parking permits and visitor parking.

Ombudsman

The Ombudsman provides a mechanism for medical students, residents, and fellows to seek advice and guidance from a neutral, third-party physician who is not involved in medical student, resident, or fellow evaluation and/or advancement. The Ombudsman will be available to serve as a sounding board for learners to voice any concerns regarding acts of unprofessional behavior (abuse, mistreatment, indiscretions, etc.) on the part of any constituents of Banner - University Medicine (faculty, staff, other learners). The Ombudsman can only provide guidance and advice to the individuals seeking assistance so that they feel supported in the decision they choose to make regarding the issue. The Ombudsman is not empowered to change a decision or intervene on an individual’s behalf. The Ombudsman offers confidential process; information is only shared with permission. The only exception to confidentiality occurs when we believe that disclosure is necessary to address an imminent risk of serious harm.

Ombudsman: William Adamas-Rappaport, MD, wdr@arizona.edu

## PRACTICE-BASED LEARNING AND IMPROVEMENT

### 19 Appropriately self-assesses and incorporates feedback to improve performance.

| Far Below Expectations - NEVER verbalizes areas for personal improvement, and fails to recognize mistakes or inadequate performance. Repeats mistakes that were brought to his/her attention. | Below Expectations - INCONSISTENTLY verbalizes areas for personal improvement, and fails to recognize mistakes or inadequate performance. Acknowledges mistakes that were brought to his/her attention, but continues to repeat behavior. | Meets Expectations - GENERALLY verbalizes areas for personal improvement. Shows some areas of progressive improvement throughout rotation. | Above Expectations - OFTEN demonstrates EXTRA effort and sincerity to improve in response to subtle suggestions. Integrates feedback from SOME sources (e.g. links verbal suggestion from attending with researched topic with comment from patient to change response). Shows specific progression by the end of the rotation. | Far Above Expectations - CONSISTENTLY demonstrates CONSIDERABLE effort and sincerity to improve in response to subtle suggestions. ACTIVELY integrates feedback from MULTIPLE sources (e.g. links verbal suggestion from attending with researched topic with comment from patient to change response). Demonstrates immediate improvement consistently throughout rotation. | N/A |

### 20 Exhibits skills of self-directed learning and retrieve evidence to advance patient care (EPA7).

| Far Below Expectations - NEVER exhibits skills in learning on his/her own and does not research information unless directly instructed to do so. | Below Expectations - INCONSISTENTLY exhibits skills in learning on his/her own and does not research information unless directly instructed to do so. | Meets Expectations - GENERALLY defines clinical questions that he/she wants to answer, identifies areas of gaps in knowledge. Demonstrates that he/she has researched information from an issue that arose in previous day or days without needing to be directly instructed. | Above Expectations - OFTEN initiates research on his/her own and conducts some additional research. Relates research back to his/her patient care. | Far Above Expectations - CONSISTENTLY initiates research on his/her own and conducts extensive research. Relates research back to his/her patient care and generates more research at the next level. | N/A |

### SYSTEMS-BASED PRACTICE
21 Advocates for quality patient care and access.

| Far Below Expectations - NEVER recognizes an obvious instance of poor access to care, to mention a need for improved quality patient care when an instance of insufficient care occurs with his/her patient. | Below Expectations - INCONSISTENTLY recognizes an obvious instance of poor access to care, to mention a need for improved quality patient care when an instance of insufficient care occurs with his/her patient. | Meets Expectations - GENERALLY inquires about or mentions obstacles to access to care. Recognizes when access to care is difficult and needs to be addressed. Provides instructions or plan for follow up care that address additional efforts to provide high standard of care. | Above Expectations - OFTEN acts to ensure access to care. Works with others to remove/diminish an obstacle to access. Works with other health care professionals or patient to improve quality of care. | Far Above Expectations - CONSISTENTLY and GOES ABOVE AND BEYOND to ensure access to care. Works with others to remove/diminish an obstacle to access. Works very actively with other health care professionals or patient to improve quality of care. | N/A |

22 Can identify system failures (e.g. patient safety issues), actively anticipates potential errors, and contributes to a culture of safety and improvement (EPA 13).

| Far Below Expectations - NEVER identifies system failures and potential errors. Does not understand how they have a part in contributing to a culture of safety and improvement. | Below Expectations - INCONSISTENTLY identifies system failures and potential errors. Does not understand how they have a part in contributing to a culture of safety and improvement. | Meets Expectations - GENERALLY understands and can identify system failures, actively anticipates potential errors, and generally knows their part in contributing to a culture of safety and improvement. | Above Expectations - OFTEN can identify system failures and how to address potential errors. Understands and knows how they have a part in contributing to a culture of safety and improvement. | Far Above Expectations - CONSISTENTLY can identify system failures and how to address potential errors. Understands and knows thoroughly how they have a part in contributing to a culture of safety and improvement. | N/A |

**SUMMARY**

This section is for you to provide open-response comments on the medical students of their performance. These comments will also help inform the clerkship director as they create an overall summary report about the student which will be included in the MSPE (Medical Student Performance Evaluation Report to the House Deans to be included in their residency application).

Please note that students will have access to these performance assessments, but you will not be personally identified in their reports.

23 Based on all the competencies and performance of the student, how would you rate the student overall?

| Far Below Expectations - The student is FAR BELOW the level equivalent to their peers at this time of their training. | Below Expectations - The student is BELOW the level equivalent to their peers at this time of their training. | Meets Expectations - The student is GENERALLY/ON PAR the level equivalent to their peers at this time of their training. | Above Expectations - The student is ABOVE the level equivalent to their peers at this time of their training. | Far Above Expectations - The student's performance FAR ABOVE the level equivalent to their peers at this time of their training. | N/A |

24 Please provide comments on the overall performance of a student, such as how s/he integrates the multiple competencies and his/her strengths and weaknesses. Consider identifying 2 areas where the student performed well and 2 areas where the student needs to improve.
MID-CLERKSHIP FORMATIVE FEEDBACK

PAUSE BEFORE COMPLETING THIS EVALUATION AND READ BELOW
To proactively address unconscious bias, take a moment to reflect on these prompts:
- Focus on a shared, common identity between you and the trainee by asking the learner about interests and activities that you have in common
- Use examples that counter identity group stereotypes. Who does this learner remind you of that is unsuccessful?
- Take the perspective of the same identity group as the learner (e.g. “walk in their shoes”)  
- Consider the opposite: when data point to one conclusion, briefly look for data supporting the opposite conclusion before making a final decision

How long have you worked with this student? _______ (days or weeks)

Feedback to the Learner
Provide effective feedback for minimum two content areas (e.g. medical knowledge, patient care, interpersonal communication skills) that you personally observed and provide the student areas of strengths / ways to improve:

What makes for effective feedback? Effective feedback is descriptive and uses non-judgmental language while focusing on specific, observable behaviors (not personality based) and offers concrete suggestions for the learner to attain a higher level of performance.

- Example 1: “Her H&Ps were organized, concise yet complete, containing expanded but appropriate differential diagnoses and accurate plans”
- Example 2: “Clinical decision making is with minimal error, and he develops strong rapport with families. His next step is to advance his written work to be complete and timely”
- Example 3: “(Name of Student) has a superior fund of knowledge and was able to synthesize information and she was able to formulate pointed and appropriate questions. Her clinical skills were above average. Her oral presentations were appropriately detailed and concise. She had excellent interactions with patients and families as well as the medical team.”

Medical Knowledge
- Exhibits appropriate knowledge and understanding of basic pathophysiological processes
- Demonstrates critical thinking and clinical decision making

### Workplace-based assessment: Check-In
Is the student meeting the minimum requirements of:
- At least 1 WBA submitted per week, for each week so far in the rotation? ___ Yes ___ No
- On track to be assessed on at least 4 different EPAs seen by the end of the rotation: ___ Yes ___ No
- On track to be assessed by at least 2 faculty and 2 residents by the end of the rotation: ___ Yes ___ No

**Written Comments:** *What clinical progress/growth is noted in the student’s WBAs to date?*

### Overall Mid-Point Evaluation Comments
**Strengths:** Overall, what did you observe to be the greatest strengths of this student? Provide minimum 2 specific examples.

**Areas of Improvement:** Provide two specific, observed behaviors where the learner could improve and develop.

**Action Plan:** Provide two specific examples for this student to focus on for growth and development for the remainder of the rotation.

### Overall Rating
Based on all criteria reviewed above, how would rate the student as this point of the clerkship:

37
For Student to Complete - Please use this space to describe the learning goal[s] that you have developed and discussed with your preceptor based on this feedback and what you will strive to work on for the remainder of this rotation:

By signing below, I acknowledge that we have met to discuss this Mid-Clerkship feedback:

Signature – Evaluator Date Signature – Student Date
Appendix B: COVID-19

COVID-19
The federal public health emergency for COVID-19 expired on May 11, 2023. The University recommends visiting the Campus Health COVID-19 Information and Resource Hub, to stay informed on the latest updates about testing, vaccinations and what to do if you test positive, https://health.arizona.edu/covid-19. If you have questions, please contact your clerkship coordinator.

If a Student Tests Positive for COVID-19
- Follow CDC guidelines (per UA guidelines)
- Notify your clerkship or elective director and coordinator and connect with your House Dean if needed.

Absence Policy
Clerkships follow the COM-T absence policy. Should a student have COVID-19 symptoms, and following testing, be COVID-19 positive, learners:

- Notify clerkship director and coordinator of COVID-19 status. Virtual options may be arranged while students are quarantining, however, those are clerkship dependent and decided by the clerkship director.
- If a student exceeds the allowable time of missed clinical shifts, they may need to be rescheduled for a future rotation, or make-up the missed clinical shifts at a future date.
- Follow CDC guidelines

Re-entering Clinical Rotations After Testing Positive
- The College of Medicine – Tucson follows CDC and Banner guidelines for re-entering clinical rotations after testing positive for COVID-19. Note, unlike Banner employees, COM-T students do not need to go to Banner Occupation Health to reenter clinical rotations.
- If you are rotating at a non-Banner clinical site, students will follow guidelines for re-entering clinical rotations for that site.

PPE
- Students are required to be fitted with an N95 mask before starting clinical rotations.
- PPE is provided by the clinical site and students should wear the same PPE as the clinical team they are working with. Please see the clerkship director for specific information, if needed.
- The COM-T mask fit policy can be accessed here.

Testing
- Banner and VA do not require testing prior to clinical entry.
- Other clinical sites may require testing. Check with your clerkship or elective rotation coordinator.
- Testing is available through the University of Arizona. Information on testing options can be found here: https://covid19.arizona.edu/covid19-testing
Appendix C: Personal Belongings and Meals

- Students are advised to keep personal belongings to a minimum as there is often limited space in the clinical setting.
- To the best of our knowledge, the cafeterias at clinical sites are open, though please do consult your site if you have questions.
- Depending on your rotation, there may not be resources available for re-heating food. Please plan ahead.
Student Exposure Procedure (Card)

In the event of an exposure, students must follow the following procedure:

1. Remove soiled clothing and wash the exposed area with soap and water, if appropriate. Administer first aid as appropriate to the exposure.*
2. Immediately notify attending physician/supervisor of exposure.
3. Students shall present to facility at which exposure occurred for assessment (includes testing of source patient) and initial prophylactic treatment if applicable.
4. If facility is unable to do initial evaluation and obtain necessary bloodwork, patient may come to UA Campus Health Service or ASU Health Service.
5. Students should present the Card to treating health care provider.
6. For Blood/Body Fluid Exposures: Following the incident, the facility at which exposure occurred shall immediately make available to the affected student a copy of all the student’s records relating to the treatment and follow up, and if and when available, results regarding the HIV, HBV, and HCV status of the source, to the extent permitted by law.
7. Following the incident, the student must work with their supervisor/department liaison to complete the online Non-Employee Incident Report Form, located on the UA Arizona Risk Management Website.
8. Within 5 days of the exposure, the student must follow up with:

TUCSON: University of Arizona Campus Health 520-621-6493
