

CENTER FOR BRAIN HEALTH

THE UNIVERSITY OF ARIZONA
College of Medicine
Tucson

BECOMING THE DESTINATION FUNCTIONAL NEUROSURGERY CENTER IN THE SOUTHWEST

With a focus on improving quality of life for patients this center will provide a powerful platform to reimagine health care for our region's aging population through the infusion of technologies and care for patients where and where they most need it. We currently offer seamless patient care by internationally known neurosurgeons and first-in-the-world therapies. As we continue toward a cure for diseases of the aging brain, we will expand our innovative learning health practice by leveraging AI and data analytics to advance early detection and treatment.

HOW YOU CAN SUPPORT OUR MISSION

"UNIVERSITY OF ARIZONA OFFERS THE ONLY ACADEMIC NEUROSCIENCES PROGRAM IN OUR REGION WITH EXPERT NEUROSURGEONS AND NEUROLOGISTS AND BEST IN CLASS RESEARCHERS. WITH OUR AGING POPULATION IN ARIZONA, IT IS IMPERATIVE TO DISCOVER AND IMPLEMENT CURES FOR BRAIN DISEASE TODAY"

-JULIE G. PILITSIS, MD, PHD, MBA
DEPARTMENT CHAIR OF NEUROSURGERY

OUR PURPOSE

We want to combine the best of academic-focused medicine, training and research with the finest delivery of care for patients with neurological diseases – treating the whole patient.

SUSTAINING DEPARTMENT GOALS – NOW AND IN THE FUTURE

Philanthropic investment raised will support:

- A world-class facility to address urgent clinical needs by leveraging research
- Implementing novel technologies to improve care and quality of life
- Employing community outreach programs
