Transition to Residency Phase Requirements: Total 44 units

1. Application to match, Med-PhD program (3 units)
2. Comprehensive Clinical Skills Examination (4 units)
3. Application of the Basic Sciences to Clinical Medicine (4 units)
4. 120 hours of required clinical rotations
5. 120 hours of required research rotations
6. 120 hours of required clerkships
7. 120 hours of required rotations (clinical, basic science, research, public health)
8. 120 hours of required rotations (clinical, basic science, research, public health)
9. 120 hours of required rotations (clinical, basic science, research, public health)
10. 120 hours of required rotations (clinical, basic science, research, public health)
11. 120 hours of required rotations (clinical, basic science, research, public health)
12. 120 hours of required rotations (clinical, basic science, research, public health)
13. 120 hours of required rotations (clinical, basic science, research, public health)
14. 120 hours of required rotations (clinical, basic science, research, public health)
15. 120 hours of required rotations (clinical, basic science, research, public health)
16. 120 hours of required rotations (clinical, basic science, research, public health)
17. 120 hours of required rotations (clinical, basic science, research, public health)
18. 120 hours of required rotations (clinical, basic science, research, public health)
19. 120 hours of required rotations (clinical, basic science, research, public health)
20. 120 hours of required rotations (clinical, basic science, research, public health)
21. 120 hours of required rotations (clinical, basic science, research, public health)
22. 120 hours of required rotations (clinical, basic science, research, public health)
23. 120 hours of required rotations (clinical, basic science, research, public health)
24. 120 hours of required rotations (clinical, basic science, research, public health)
25. 120 hours of required rotations (clinical, basic science, research, public health)
26. 120 hours of required rotations (clinical, basic science, research, public health)
27. 120 hours of required rotations (clinical, basic science, research, public health)
28. 120 hours of required rotations (clinical, basic science, research, public health)
29. 120 hours of required rotations (clinical, basic science, research, public health)
30. 120 hours of required rotations (clinical, basic science, research, public health)
31. 120 hours of required rotations (clinical, basic science, research, public health)
32. 120 hours of required rotations (clinical, basic science, research, public health)
33. 120 hours of required rotations (clinical, basic science, research, public health)
34. 120 hours of required rotations (clinical, basic science, research, public health)
35. 120 hours of required rotations (clinical, basic science, research, public health)
36. 120 hours of required rotations (clinical, basic science, research, public health)
37. 120 hours of required rotations (clinical, basic science, research, public health)
38. 120 hours of required rotations (clinical, basic science, research, public health)
39. 120 hours of required rotations (clinical, basic science, research, public health)
40. 120 hours of required rotations (clinical, basic science, research, public health)
41. 120 hours of required rotations (clinical, basic science, research, public health)
42. 120 hours of required rotations (clinical, basic science, research, public health)
43. 120 hours of required rotations (clinical, basic science, research, public health)
44. 120 hours of required rotations (clinical, basic science, research, public health)
