# Institutional Policy on Anesthesiology Pain Medicine Educational Resources

Graduate Medical Education Committee - Policies and Procedures

## Purpose

In order to comply with ACGME requirements in anesthesiology and anesthesiology pain medicine programs, the University of Arizona College of Medicine Graduate Medical Education Committee (GMEC) sets forth this policy to govern the educational resources committed to pain medicine training programs and to ensure cooperation of all involved disciplines.

The Internal Review will serve as the mechanism to review the educational resources available in the institution with regard to the required anesthesiology rotation in pain medicine and any elective choices in the anesthesiology pain medicine program. Educational resources include, but are not limited to, patient care and research resources that are essential to the learning environment for anesthesiology pain medicine residents. These will be assessed during the Internal Review to ensure compliance with the applicable program requirements.

Effective 10/1/2005

Revised 8/2010
